An Efficient Energy Future United Nations. Economic Commission for Europe, 1983
The European Energy Challenge George Walter Hoffman, Leslie Dienes, 1985 By examining all of Europe in a single study an eminent geographer and expert on European development makes in this volume a unique contribution to the understanding of the changing energy relations of the European countries east and west The book examines the problem of establishing a reliable energy supply base in western Europe through structural changes and alternate and substitute energy sources The volume also evaluates western European security problems arising from present and future reliance on Soviet energy and relates this to North Sea supplies of gas and oil indigenous and import supplies and nuclear power generation
Future Survey Annual 1984 World Future Society, 1984-06-01
Energy Abstracts for Policy Analysis, 1984
Economic Bulletin for Europe, 1986
Macroeconomic Prospects for a Small Oil Exporting Country O. Bjerkholt, E. Offerdal, 2012-12-06
Western Europe Hugh Clout, Mark (Reader In Geography, University Of Exeter) Blacksell, Russell (Professor Of Geography, University Of Sussex) King, David (Professor Of Economic Geography, University Of Plymouth) Pinder, 2014-09-19 Western Europe provides a balanced appraisal of common characteristics and shared problems of the eighteen states lying to the west of the former Iron Curtain
Energy And Environment In The Transition Economies William Chandler, 2018-02-13 Energy and environmental issues in the former Soviet sphere rank as global policy priorities for three reasons First civilian application of military nuclear materials multiplies the threat of terrorism Second Russian and Caspian oil resources affect world markets Western energy security and regional stability Third climate change may become a global challenge commensurate with the Cold War and the transition economies the former Soviet Union and Eastern Europe offer the world's largest and cheapest near term opportunities for curbing greenhouse gas emissions Yet the region remains unprepared to deal with these issues and Western assistance has failed to help A second generation of reform efforts is needed led from within but supported by the West In *Energy and Environmental Policies in the Transition Economies* William Chandler synthesizes disparate specialized analyses and publications He draws on a relatively large body of research on energy technology oil and gas markets geopolitics finance economic reform and environmental science specific to Russia

eastern Europe and the transition economies In successive chapters Chandler reviews energy use energy efficiency nuclear safety and security petroleum geoeconomics coal utility monopoly and competition and environmental and climatic change in the former Soviet Union and Central and Eastern Europe Chandler also considers options for a second generation of reform efforts The subject matter of the book is significant not only for the energy and environmental policies themselves important though they are but because those policies in turn affect regional political stability and Western energy security Energy and Environmental Policies in the Transition Economies will be of considerable interest to policymakers in government to private sector actors to academic scholars and to students of international energy and environmental politics
