**The Enlightenment Rediscovery of Egyptology** Angela Scattolin Morecroft, 2017-12-14 In 1759 the botanist and scientist Vitaliano Donati led an expedition to Egypt under the patronage of King Carlo Emanuele III of Sardinia to acquire Egyptian antiquities for the Museum in Turin Charting his tumultuous expedition this book reveals how in spite of his untimely death in 1762 Donati managed to send enough items back to Turin to lay the foundations for one of the earliest and largest systematic collections of Egyptology in Europe and help to bring the world of ancient Egypt into the consciousness of Enlightenment scholarship Whilst the importance of this collection has long been recognised its exact contents have been remained largely unknown War the Napoleonic occupation of Italy and the amalgamation and reorganisation of museum collections resulted in a dispersal of objects and loss of provenance As a result it had been supposed that the actual contents of Donati's collection could not be known However the discovery by Angela Morecroft in 2004 of Donati's packing list reveals the exact quantity and type of objects that he acquired offering the possibility to cross reference his descriptions with unidentified artifacts at the Museum By examining Donati's expedition to Egypt and seeking to identify the objects he sent back to Turin this book provides a fascinating insight into early collecting practice and the lasting historical impact of these items As such it will prove a valuable resource for all those with an interest in the history of museums and collecting as well as enlightenment travels to Egypt

NG** *National Geographic and the scientific search for Atlantis* Georgeos Díaz-Montexano, 2017-02-11 First of all it is my duty to make it clear for the reader that this book is a very condensed summary of a series of books that have been already published more than thirty books written by the author about historical and scientific Atlantology On this occasion the author has tried to summarize as much as possible the extensive footnotes dense critical apparatus and extensive bibliographic references from previous editions which were aimed at a more academic or specialized public The purpose of this brief work is to give a fast and simple overview of the hypothesis investigations contributions and findings related to Atlantis carried out by the author over the last two decades no matter the level of expertise focusing particularly on those issues that have been handled

and only briefly explained by the author in the fascinating documentary Atlantis Discovered produced by James Francis Cameron Yaron Niski y Felix Golubev and directed by the Canadian award winning filmmaker Simcha Jacobovici for National Geographic In this regard I hope this book serves as a complement to improve data and details that could not be appreciated when watching the documentary for obvious production reasons No documentary no matter how lengthy is can gather all the details of a research let alone when the author s participation is only partial having to share it with some other experts who proposed different hypotheses related to the location of Atlantis in the Mediterranean and Azores area Two hours are not enough nor would be three or four more hours to sum up albeit briefly several hypotheses At least a series of ten lengthy chapters would be required to develop more fully the author s investigations about Atlantis For these reasons among other ones but specially due to the high level of complexity both linguistic and interpretative that results from underwater works everything related
