Rosemond has been counseling parents about how to help children do their best in school. This new book draws on all of that knowledge and experience so that parents can set their kids on the path to success in education even at age three. Dealing with common problems like how much and what kind of help to give with homework, what to do when a child misbehaves in school, and how to deal with academic performance that consistently falls below a child's ability level. Rosemond addresses every issue with time-tested advice and methods. Other books on schoolwork encourage lots of parental involvement. Not this one. Rosemond's approach will help parents disengage from homework and other hassles as they manage their children to even greater success in the classroom. Describing his behavior management strategies that are used by school systems all over the country, he writes with an entertaining, compelling style that will keep parents reading the valuable, helpful information in John Rosemond's *Fail-Safe Formula for Helping Your Child Succeed in School*, and the book promises to earn high marks for both parents and children. *Parent School*, 2004-02-19. A collection of 78 original essays from the most respected parenting authors of our time. These leading authorities have contributed what they consider to be their most valuable lesson, philosophy, tips, advice for parents. **Effective Alternative Education Programs** Christopher Scott Chalker, Kimila S. Brown, 1999-08-04. The number of alternative education programs in the United States has increased significantly over the past several years. Unfortunately, the number of resource books addressing alternative education has not paralleled program growth. Filling a major gap in the literature, Chalker and Brown provide concrete solutions to challenging problems associated with the planning, development, and implementation of alternative education programs for K-8 students. They break the book into equal parts treating respectively K-5, 6-8, and combined K-8 efforts at prevention and early intervention before students reach high school. Public school administrators and alternative program educators will find this book useful, and educational professionals at the national and state level will appreciate the activities aimed at school improvement initiatives.
