Eighteenth Century Feminist Mind:

The Eighteenth Century Feminist Mind Alice Browne, 1987 Estudia el desarrollo y las características del pensamiento feminista que se desarrolló en el s XVIII. Este pensamiento se centraba o defendía la necesidad del cambio en tres aspectos: el de la desigualdad en la educación, la debilitada posición económica y legal de la mujer, sobre todo en el matrimonio y el doble estándar moral según el sexo. Contiene bibliografía.

The Women's Movements in the United States and Britain from the 1790s to the 1920s Christine Bolt, 2014-09-25 This book presents a study of the development of the feminist movement in Britain and America during the 19th century. Acknowledging the similar social conditions in both countries during that period, the author suggests that a real sense of distinctiveness did exist between British and American feminists. American feminists were inspired by their own perception of the superiority of their social circumstances, for example, whereas British feminists found their cause complicated by traditional considerations of class. Christine Bolt aims to show that the story of the American and British women's movement is one of national distinctiveness within an international cause. This book should be of interest to students and teachers of American and British political history and women's studies.

Gender in Eighteenth-Century England Hannah Barker, Elaine Chalus, 2014-06-17 A new collection of essays which challenges many existing assumptions, particularly the conventional models of separate spheres and economic change. All the essays are specifically written for a student market, making detailed research accessible to a wide readership, and the opening chapter provides a comprehensive overview of the subject, describing the development of gender history as a whole and the study of eighteenth-century England. This is an exciting collection which is a major revision of the subject.

The Enlightened Mind: Education in the Long Eighteenth Century Amanda Strasik, 2022-10-04 The rise of Enlightenment philosophical and scientific thought during the long eighteenth century in Europe and North America c. 1688-1815 sparked artistic and political revolutions, reframed social gender and race relations, reshaped attitudes toward children and animals, and reconceptualized womanhood, marriage, and family life. The meaning of education at this time was wide-ranging, and access to it was divided along lines of gender, class, and race. Learning happened in diverse environments under the tutelage of various teachers, ranging from bourgeois mothers at home to Spanish clergy to nature itself. The contributors to this cross-disciplinary volume weave together methods in art history, gender studies, and literary analysis to reexamine education in different contexts during the Enlightenment era. They explore the implications of redesigned curricula, educational categorizations, and spaces; pedagogical aids and games; the role of religion; and new prospects for visual artists, parents, children, and society at large. Collectively, the authors demonstrate how new learning opportunities transformed familial structures and the socio-political conditions of urban centers in France, Britain, the United States, and Spain. Expanded approaches to education also established new artistic practices and redefined women's roles in the arts. This volume offers groundbreaking perspectives on education that will appeal to beginning and
