## **Eighteenth Century French Cantata:**

**The Eighteenth Century French Cantata** David Tunley, 1997 The first edition of this book is the classic study of one of the most popular musical forms in early eighteenth century France not only because it documents and examines its considerable repertoire for the first time but also because it places the genre in the wider context of both French and Italian baroque music styles In uniting the two national styles the cantata was one of the major influences in transforming the seventeenth century French classical tradition in music into a style that owed much to the Italian baroque yet retained a distinctive gallic expression As well as its musical interest the French cantata provides an arresting example of the influence of society upon music and the book commences with a chapter that views the emergence of the form in its social setting Cantata texts enjoyed a vogue as poetry and this literary aspect is also dealt with in a separate chapter This new edition incorporates research by the author and other scholars over the twenty years since the first edition reflecting today's growing interest in French baroque music It also features a new chapter dealing with the French cantata in performance

The Eighteenth-century Secular French Cantata David Tunley, 1969 **The Eighteenth Century French Cantata on Microfilm** David Tunley, 197? Cantatas Louis Nicolas Clérambault, **Aspects of the Secular Cantata in Late Baroque Italy** Michael Talbot, 2017-07-05 As shown by the ever increasing volume of recordings editions and performances of the vast repertory of secular cantatas for solo voice produced primarily in Italy in the second half of the seventeenth century and the first half of the eighteenth century this long neglected genre has at last come of age However scholarly interest is currently lagging behind musical practice incredibly there has been no general study of the Baroque cantata since Eugen Schmitz's handbook of 1914 and although many academic theses have examined microscopically the cantatas of individual composers there has been little opportunity to view these against the broader canvas of the genre as a whole The contributors in this volume choose aspects of the cantata relevant to their special interests in order to say new things about the works whether historical analytical bibliographical discographical or performance based The prime focus is on Italian born composers working between 1650 and 1750 thus not Handel but the opportunity is also taken in one chapter by Graham Sadler to compare the French cantata tradition with its Italian parent in association with a startling new claim regarding the intended instrumentation Many key figures are considered among them Tomaso Albinoni Giovanni Bononcini Giovanni Legrenzi Benedetto Marcello Alessandro Scarlatti Alessandro Stradella Leonardo Vinci and Antonio Vivaldi The poetic texts of the cantatas all too often treated as being of little intrinsic interest are given their due weight Space is also found for discussions of the history of Baroque solo cantatas on disc and of the realization of the continuo in cantata arias a topic more complex and contentious than may at first be apparent The book aims to stimulate interest in and to win converts to this genre which in its day equalled the instrumental sonata in importance and in which more than a few composers invested a

Buelow, 2004-11-23 A History of Baroque Music is a detailed treatment of the music of the Baroque era with particular focus on the seventeenth century The author's approach is a history of musical style with an emphasis on musical scores The book is divided initially by time period into early and later Baroque 1600 1700 and 1700 1750 respectively and secondarily by country and composer An introductory chapter discusses stylistic continuity with the late Renaissance and examines the etymology of the term Baroque The concluding chapter on the composer Telemann addresses the stylistic shift that led to the end of the Baroque and the transition into the Classical period Jacket      Cantatas François Colin de Blamont,      *Essays on the Performance of Baroque Music* Mary Cyr, 2024-10-28 In this collection of essays Mary Cyr explores some of the written and unwritten performance conventions that applied to French and English music of the 17th and early 18th centuries Using composers own notations marks added by 18th century performers historical treatises and pictorial evidence she investigates both vocal and instrumental genres including opera cantatas instrumental chamber music and solo music for the viol and violin Some of the performance conventions remain controversial such as the use of gesture by the French opera chorus and others are still little known such as the use of the double bass for rhythmic and harmonic support in early 18th century French opera As many of these essays demonstrate French Baroque music allowed performers a wider latitude of nuance and expression than is often assumed today The essays in this volume will be of particular interest to scholars and performers who are interested in adopting a historically informed approach to performing music by Henry Purcell Elisabeth Claude Jacquet de La Guerre Jean Philippe Rameau and their contemporaries Several studies also deal with attributions sources and the discovery of a cantata by Rameau      The Harvard Dictionary of Music Don Michael Randel, 2003-11-28 This classic reference work the best one volume music dictionary available has been brought completely up to date in this new edition Combining authoritative scholarship and lucid lively prose the Fourth Edition of The Harvard Dictionary of Music is the essential guide for musicians students and everyone who appreciates music      **Church and Society in Eighteenth-century France: The clerical establishment and its social ramifications** John McManners, 1998 This is the first of two volumes in McManners' magisterial reconstruction of the complex hierarchical world of the Gallican Church destroyed by the French Revolution It describes the diocesan and parochial structure of the Church portraying the clergy and their lifestyle from the palaces of the
