Future Of Traditional Destinationsis Their Experience Relevant To Emerging Countries In Europe Is:

Innovation and Tourism Destination Development Henrik Halkier,Marek Kozak,Bo Svensson,2017-10-02 Tourism is a central part of regional development strategies in many localities around Europe not just in traditional coastal or mountain resorts but also in areas without a strong track record with regard to visitor economy In a globalising world destinations can no longer take their traditional visitors for granted and escape growing competitive pressures because increasingly experienced specialised and demanding travellers now have a vastly greater number of potential destinations to choose from Both well established and emerging tourist destinations are therefore under pressure to be innovative to increase their attractiveness in the globalising visitor economy This book focuses on the role played by tourist destinations conceived as multi layered and functional governance structures in stimulating or complicating the development of new tourist experiences The complex relationship between firm level and territorial development dynamics is of course by no means confined to tourism development and the book will therefore be of a more general relevance for research into innovation and spatial development dynamics This book was published as a special issue of European Planning Studies *The Stationery Office Agency Catalogue* Stationery Office (Great Britain),2005

High-Skilled Migration Mathias Czaika,2018-02-08 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers An improved understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic social and political drivers of migration which may be equally or sometimes even more important than migration policies per se A better understanding of migration policies their making consequences and limitations requires a systematic knowledge of the broader economic social and political structures and their interaction in both origin and destination countries This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual city national and international level
