*Future Wealth* James Robertson,1990      Green Economics Molly Scott Cato,2012-05-16 The world as we know it needs a new economics Climate change financial crisis and out of control globalization all the major problems facing the world have their root in the dominant economic system The globalised marketplace is the prevailing force in our lives undermining the real importance of our human communities and our planet Green Economics argues that society should be embedded within the ecosystem and that markets and economies are social structures that should respond to social and environmental priorities This highly readable text provides an introduction to green economics including views on taxation welfare money economic development and employment through the work of its inspirational figures including Schumacher Robertson and Douthwaite It also explores the contributions and insights of schools of thought critical of the dominant neo classical economic paradigm including ecofeminism views from the global South and the perspective of indigenous peoples Examples of effective green policies that are already being implemented across the world are presented as well as policy prescriptions for issues including climate change localization citizens income economic measurement ecotaxes and trade      **The City of Grace** David Wadley,2019-11-29 In this sweeping appraisal of the urban condition David Wadley argues that anything less than high level resolution in modelling the well being of inhabitants is wasting precious time Humanity is encountering rising entropy caused by unsustainable economic and demographic expansion Supported by a strong interdisciplinary backdrop featuring systems and crisis theories The City of Grace tackles these obstacles by picturing gracious function and graceful form in a human scale settlement In an attempt to salvage things lost in the teleology of urban development over the last 100 years the outlook is both heterodox and contrarian How long can we all go on in the present way In addressing grace a more elevated concept than those focusing previous urban analyses this manifesto aims not to placate or please but instead to get humanity to face the encompassing realities it tries so hard to forget      *Tomorrow's World* Duncan McLaren,Dr Duncan|Bullock McLaren (Simon|Yousuf, Nusrat),Simon Bullock,Nusrat Yousuf,2013-11-05 This title uses the concept of environmental space to resolve many of the issues facing us in the future and applies the lessons specifically to the UK Believing that we occupy more environmental space than the world can afford this book seeks to explain what we can do to live comfortably within what we actually have through efficiency and sufficiency In addition it aims to present the sustainable levels of consumption for Britain as targets for government industry and households as well as an idea of how to achieve them      **Alexandria 4** David Fideler,1997-01-01 Alexandria explores the relationships between philosophy cosmology myth and culture the spiritual philosophical and intellectual heritage of the Western World and what the humanities have to contribute to the world today      **Growth, Development and Poverty Alleviation in the Asia-Pacific** Kartik Chandra Roy,Srikanta Chatterjee,2007 This volume presents a variety of papers on issues related to growth development and poverty prepared by specialists in their particular development related fields While the living standards of most people around the

world have improved over time in absolute terms many are still in desperate poverty The major bulk of humanity lives in the continent of Asia and it is here that some of the more spectacular contrasts in both economic growth and levels of affluence and destitution can be found Whether India and China can continue to grow as fast as they have done in recent years remains to be seen More importantly perhaps whether growth alone can reduce poverty in these countries and in others is a question that needs to be discussed and understood Outside of India and China the African continent particularly the nations in Sub Saharan Africa is home to large numbers of poor and deprived humanity Many of these countries are natural resource rich but that has not enabled many of them to achieve adequate growth and reduce poverty As countries grow they put extra pressure on both global resources and the natural environment The question as to whether there are finite limits to economic growth in a global sense is one that has long exercised thinkers Technological progress has often enabled countries to economise on resource use without sacrificing growth Whether that can continue indefinitely is also a question that has acquired a new urgency with the recent faster growth experience of the most populous countries
