Futures - Human and Divine Ted Peters, 1946 The Future Life Emanuel Swedenborg, 1853 *Future Thinking in Roman Culture* Maggie L. Popkin, Diana Y. Ng, 2021-12-30 *Future Thinking in Roman Culture* is the first volume dedicated to the exploration of prospective memory and future thinking in the Roman world integrating cutting edge research in cognitive sciences and theory with approaches to historiography epigraphy and material culture This volume opens a new avenue of investigation for Roman memory studies in presenting multiple case studies of memory and commemoration as future thinking phenomena It breaks new ground by bringing classical studies into direct dialogue with recent research on cognitive processes of future thinking The thematically linked but methodologically diverse contributions all by leading scholars who have published significant work in memory studies of antiquity both cultural and cognitive make the volume well suited for classical studies scholars and students seeking to explore cognitive science and philosophy of mind in ancient contexts with special appeal to those sharing the growing interest in investigating Roman conceptions of futurity and time The chapters all deliberately coalesce around the central theme of prospection and future thinking and their impact on our understanding of Roman ritual and religion politics and individual motivation and intention This volume will be an invaluable resource to undergraduate and postgraduate students of classics art history archaeology history and religious studies as well as scholars and students of memory studies historical and cultural cognitive studies psychology and philosophy **Knowing Future Time In and Through Greek Historiography** Alexandra Lianeri, 2016-03-07 From the early modern period Greek historiography has been studied in the context of Cicero's notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past Comparisons with the Roman Judeo Christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present In this volume distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time The Future Human Lee Harris, Regina Meredith, 2025-03-18 **REVELATIONS FROM THE Z S ABOUT WHAT LIES AHEAD** Humanity is facing an unprecedented phase of evolution planetary revolution and the acceleration of time More and more people are seeking guidance as they wake up to a connection with something far bigger than what they were taught about human life Channeled by Lee Harris and prompted by Regina Meredith's incisive questions Lee's guides the Z's expose the lies promulgated throughout history

Nietzsche Ernst Bertram, 2010-10-01 The only English translation of a crucial interpretation of Nietzsche First published in 1918 Ernst Bertram's Nietzsche Attempt at a Mythology substantially shaped the image of Nietzsche for the generation between the wars It won the Nietzsche Society's first prize and was admired by luminous contemporaries including Andr Gide Hermann Hesse Gottfried Benn and Thomas Mann Although translated into French in 1932 the book was never translated into English following the decline of Nietzsche's and Bertram's reputations after 1945 Now with Nietzsche's importance for twentieth century thought undisputed the work by one of his most influential interpreters can at last be read in English Employing a perspectival technique inspired by Nietzsche himself Bertram constructs a densely layered portrait of the thinker that shows him riven by deep and ultimately irresolvable cultural historical and psychological conflicts At once lyrical and intensely probing richly complex yet thematically coherent Bertram's book is a masterpiece in a forgotten tradition of intellectual biography

The Religion of the Future Eduard von Hartmann, 1886 *Universe, Human Immortality and Future Human Evaluation*

Alexander Bolonkin,2011-12-06 This book debates the universe the development of new technologies in the 21st century and the future of the human race Dr Bolonkin shows that a human soul is only the information in a person s head He offers a new unique method for re writing the main brain information in chips without any damage to the human brain This is the scientific prediction of the non biological electronic civilization and immortality of the human being Such a prognosis is predicated upon a new law discovered by the author for the development of complex systems According to this law every self copying system tends to be more complex than the previous system provided that all external conditions remain the same The consequences are disastrous humanity will be replaced by a new civilization created by intellectual robots which Dr Bolonkin refers to as E humans and E beings These creatures whose intellectual and mechanical abilities will far exceed those of man will require neither food nor oxygen to sustain their existence They may have the emotion Capable of developing science technology and their own intellectual abilities thousands of times faster than humans can they will in essence be eternal Demonstrates that the problem of immortality can only be solved by changing the biological human into an artificial form Discusses progress in robotics and other techologies Understanding the Free-Will Controversy Thomas Talbott,2022-08-16 What is free will and do humans possess it While these questions appear simple they have tied some of our greatest minds in knots over the millennia This little book seeks to clarify for an audience of educated non specialists some of the issues that often arise in philosophical disputes over the existence and the nature of human free will Beyond that it proposes a particular solution to the puzzles Many philosophers have argued that free will is incompatible with determinism and many have also argued that it is incompatible with indeterminism So is free will simply an incoherent concept Talbott argues that the best way out of this quagmire requires that we come to appreciate why certain conditions essential to our emergence as free moral agents conditions such as indeterminism ignorance and a context of ambiguity and misperception are themselves obstacles to a fully realized freedom For a fully realized freedom requires that as minimally rational individuals we have learned some important lessons for ourselves and once these lessons have been learned some of our freest choices may be such that we could not have chosen otherwise because so choosing would then seem to us utterly unthinkable and irrational **The ^AConflict Myth and the Biblical Tradition** Debra Scoggins Ballentine,2015-06-01 In The Conflict Myth and the Biblical Tradition Debra Scoggins Ballentine analyzes the ancient west Asian theme of divine combat between a victorious warrior deity and his enemy typically the sea or a sea dragon **Ontology of Divinity** Mirosław Szatkowski,2024-04-22 This volume announces a new era in the philosophy of God Many of its contributions work to create stronger links between the philosophy of God on the one hand and mathematics or metamathematics on the other hand It is about not only the possibilities of applying mathematics or metamathematics to questions about God but also the reverse question Does the philosophy of God have anything to offer mathematics or metamathematics The remaining contributions tackle stereotypes in the philosophy of religion The volume includes 35 contributions It is divided into nine

Feinberg,2006-04-26 Many contemporary theologians claim that the classical picture of God painted by Augustine and Aquinas is both outmoded and unbiblical But rather than abandoning the traditional view completely John Feinberg seeks a reconstructed model one that reflects the ongoing advances in human understanding of God s revelation while recognizing the unchanging nature of God and His Word Feinberg begins by exploring the contemporary concepts of God particularly the openness and process views and then studies God s being nature and acts all to articulate a mediating understanding of God not just as the King but the King who cares Part of the Foundations of Evangelical Theology series The Future of Science Ernest Renan,1893
