Fuzzy Logic Foundations and Industrial Applications Da Ruan, 2012-12-06 Fuzzy Logic Foundations and Industrial Applications is an organized edited collection of contributed chapters covering basic fuzzy logic theory fuzzy linear programming and applications Special emphasis has been given to coverage of recent research results and to industrial applications of fuzzy logic The chapters are new works that have been written exclusively for this book by many of the leading and prominent researchers such as Ronald Yager Ellen Hissdal Etienne Kerre and others in this field The contributions are original and each chapter is self contained The authors have been careful to indicate direct links between fuzzy set theory and its industrial applications Fuzzy Logic Foundations and Industrial Applications is an invaluable work that provides researchers and industrial engineers with up to date coverage of new results on fuzzy logic and relates these results to their industrial use

Industrial Applications of Fuzzy Technology in the World Kaoru Hirota, Michio Sugeno, 1995 The 1980s saw a whole wave of practical applications of fuzzy theory mainly in the field of process control with Japan as pioneer In the 90s there has been a flood of applications to household electrical appliances and fuzzy has become a high tech buzz word in Japan Since then many countries have followed suit and developed their own fuzzy applications This book reviews the burgeoning industrial applications of fuzzy theory The contributors are mostly industrial engineers or research experts in the field The areas covered include automobiles home appliances voice recognition medical techniques fuzzy design process control space operations and mobile autonomous robots Very recently the development of fuzzy theory has become intertwined with fields such as neural networks and chaos This volume also summarizes such trends in an industrial context The book will be of use to senior undergraduates or graduate students industrial research scientists and anyone interested in the wide ranging applicational aspects of fuzzy theory today

First Course on Fuzzy Theory and Applications Kwang Hyung Lee, 2006-11-30 Fuzzy theory has become a subject that generates much interest among the courses for graduate students However it was not easy to find a suitable textbook to use in the introductory course and to recommend to the students who want to self study The main purpose of this book is just to meet that need The author has

given lectures on the fuzzy theory and its applications for ten years and continuously developed lecture notes on the subject This book is a publication of the modification and summary of the lecture notes The fundamental idea of the book is to provide basic and concrete concepts of the fuzzy theory and its applications and thus the author focused on easy illustrations of the basic concepts There are numerous examples and figures to help readers to understand and also added exercises at the end of each chapter This book consists of two parts a theory part and an application part The first part theory part includes chapters from 1 to 8 Chapters 1 and 2 introduce basic concepts of fuzzy sets and operations and Chapters 3 and 4 deal with the multi dimensional fuzzy sets Chapters 5 and 6 are extensions of the fuzzy theory to the number and function and Chapters 7 and 8 are developments of fuzzy properties on the probability and logic theories *A Tribute to Prof. Dr. Da Ruan* Jie Lu, Etienne Kerre, 2012-07-18 This volume is a tribute to Professor Dr Da Ruan who passed away suddenly on July 31 2011 aged 50 The flood of emails that spread throughout the fuzzy logic research community with the tragic news was testimony to the respect and liking felt for this remarkable man Da was a hardworking highly productive scientist who during his short life published 35 books and more than 250 research papers in highly ranked journals and conference proceedings He established two successful conferences FLINS and ISKE as well as the international journal JCIS This book is a collection of contributions from 88 of Da s academic friends from 47 institutes presented in 60 chapters and over 70 pictures A Foreword by Lotfi Zadeh begins Da s story Section 1 provides an overview of Da s funeral on August 6 2011 Part II outlines Da s scientific life his education scientific career publications and keynote talks Part III presents testimonials by Da s colleagues of academic activities including guest professorships and his many visits to foreign institutes Part IV contains thirty contributions from colleagues and friends across the world to describe their collaborative experience with Da We hope this book will keep the memory of Da alive great scientist great friend great humanitarian He will remain in our hearts forever *Soft Computing and Its Applications* Rafik Aziz ogly Aliev, R. R. Aliev, 2001 The concept of soft computing is still in its initial stages of crystallization Presently available books on soft computing are merely collections of chapters or articles about different aspects of the field This book is the first to provide a systematic account of the major concepts and methodologies of soft computing presenting a unified framework that makes the subject more accessible to students and practitioners Particularly worthy of note is the inclusion of a wealth of information about neuro fuzzy neuro genetic fuzzy genetic and neuro fuzzy genetic systems with many illuminating applications and examples **Intelligent Systems and Interfaces** Horia-Nicolai Teodorescu, Daniel Mlynek, Abraham Kandel, Hans-Jürgen Zimmermann, 2012-12-06 The field of intelligent interfaces and systems has seen a fast growth last decade An impressive number of papers conference tutorials and volumes were devoted to the topic Ten years ago intelligent systems constituted a rather exotic topic and many were skeptic that such systems amount to more than a nice name Nowadays intelligent systems represent a powerful tool in many applications in all industrial fields Their development evolved on both the horizontal dimension with a constantly increasing

number of applications and on the vertical dimension by including more capabilities going from sensoric to neurofuzzy systems intelligent agents speech and image understanding and decision making in complex environments The domain constituted by the intelligent systems is now too large to be covered in a single volume Consequently the Editors considered a balance between several selected sub fields to insure the unity of the volume yet allowing a large enough horizon and a consistent understanding of the entire field including real life applications The volume represents a comprehensive coverage of the field including fundamental aspects software sensors and hardware related issues Moreover the contributors to this volume offer beyond a systematic overview of intelligent interfaces and systems deep practical knowledge in building and using intelligent systems in various applications A special emphasis is on specific aspects and requirements in applications In addition the second Editor proposes two chapters addressing the management of projects dealing with intelligent systems

Mathematics of Fuzziness—Basic Issues Xuzhu Wang, Da Ruan, Etienne E. Kerre, 2009-04-03 Mathematics of Fuzziness Basic Issues introduces a basic notion of fuzziness and provides a conceptual mathematical framework to characterize such fuzzy phenomena in Studies in Fuzziness and Soft Computing The book systematically presents a self contained introduction to the essentials of mathematics of fuzziness ranging from fuzzy sets

fuzzy relations fuzzy numbers fuzzy algebra fuzzy measures fuzzy integrals and fuzzy topology to fuzzy control in a strictly mathematical manner It contains most of the authors research results in the field of fuzzy set theory and has evolved from the authors lecture notes to both undergraduate and graduate students over the last three decades A lot of exercises in each chapter of the book are particularly suitable as a textbook for any undergraduate and graduate student in mathematics computer science and engineering The reading of the book will surely lay a solid foundation for further research on fuzzy set theory and its applications

Cooperative and Noncooperative Multi-Level Programming

Masatoshi Sakawa, Ichiro Nishizaki, 2009-06-18 To derive rational and convincing solutions to practical decision making problems in complex and hierarchical human organizations the decision making problems are formulated as relevant mathematical programming problems which are solved by developing optimization techniques so as to exploit characteristics or structural features of the formulated problems In particular for resolving conflict in decision making in hierarchical managerial or public organizations the multi level formulation of the mathematical programming problems has been often employed together with the solution concept of Stackelberg equilibrium However

we conceive that a pair of the conventional formulation and the solution concept is not always sufficient to cope with a large variety of decision making situations in actual hierarchical organizations The following issues should be taken into consideration in expression and formulation of decision making problems

Information of mathematical programming problems
It is tacitly supposed that decisions are made by a single person while game theory deals with economic behavior of multiple decision makers with fully rational judgment Because two level mathematical programming problems are interpreted as static Stackelberg games multi level mathematical programming is relevant to noncooperative game theory in conventional multi level mathematical programming models employing the solution concept of Stackelberg equilibrium it is assumed that there is no communication among decision makers or they do not make any binding agreement even if there exists such communication However for decision making problems in such as decentralized large firms with divisional independence it is quite natural to suppose that there exists communication and some cooperative relationship among the decision makers
