## **Fuzzy Logic Dispatches From The Information Revolution:**

*Fuzzy Logic* Matthew Friedman, 1997 Fuzzy Logic is really about how the Internet and related technologies have infiltrated our daily lives how it is changing established social patterns and eroding older technologies at a hugely accelerated rate There is a social cost to this kind of change and a personal sense of loss or melancholy Friedman evokes this bittersweet feeling without wallowing in it More importantly Friedman with considerable good humour deflates some of the more egregious babblings of the techno Messiahs who would have us believe that we have reached a digital state of grace Mark Shainblum *Internet Quarterly*      Semiotics and Dis/ability Linda J. Rogers, Beth Blue Swadener, 2001-03-22 Examines

the ways that the labels disability and difference are socially and culturally constructed      **Terrorism and the Internet** Hans-Liudger Dienel, 2010 Intends to analyze the abuse of the internet for terrorism and crime purposes under two new perspectives the persuasion and involvement of women and children as specific target user groups and the development of new strategies to use extremist web forums as an open book in order to understand and gain insight into terrorist thinking
