Banner,2000-07-03 Exploring the intersections of biography and autobiography East and West faith and reason Finding Fran tells the story of two high school friends who took radically different paths Lois Banner became an academic feminist while Fran Huneke converted to Islam joining the mystical Sufi Order and moving to Egypt      **Gertrude, Mabel, May** Gwendolyn Leick,2019-06-30 Gertrude Stein s first novel one that was never published during her lifetime was called Q E D She wrote it to exorcise the experience of her first passionate love affair with the New Yorker May Bookstaver the friend and lover of the Bostonian Mabel Haynes a fellow student of Gertrude Stein s at Johns Hopkins Medical School between 1898 and 1902 The impact of the complicated affair on Stein s writing has attracted considerable attention but the subsequent lives of her two intimate friends have not been covered so far in any detailed way Gwendolyn Leick is the granddaughter of Mabel Haynes who moved to Austria Hungary in 1905 She began

writing this book after the chance discovery of her grandmother's part in Gertrude Stein's life some six years ago in order to do justice to these remarkable women. The method of writing lays out the things, the notions and ideas, the people, friends, relatives, lovers, husbands in the form of associative entries woven around Gertrude Stein's texts as much as on private letters, photographs and other found objects. It is an encyclopaedic enterprise rather than a chronologically ordered biographical account. The character and the lives of the three protagonists and the times they lived in emerge through the kaleidoscope of the accumulated vignettes.

**The Science of Consciousness** Trevor A. Harley, 2021-02-18. Consciousness concerns awareness and how we experience the world. How does awareness, a feature of the mental world, arise from the physical brain? Is a dog conscious or a jellyfish and what explains the difference? How is consciousness related to psychological processes such as perception and cognition? The Science of Consciousness covers the psychology, philosophy and neuroscience of consciousness. Written for introductory courses in psychology and philosophy, this text examines consciousness with a special emphasis on current neuroscience research as well as comparisons of normal and damaged brains. The full range of normal and altered states of consciousness including sleep and dreams, hypnotic and meditative states, anesthesia and drug-induced states as well as parapsychological phenomena and their importance for the science of consciousness is covered as well as the higher states and how we can attain them. Throughout the text, attempts to relate consciousness to the brain.

*The Law of Vibration* William D. Gann, 2013-02-25. In *The Law of Vibration*, Tony Plummer presents a new theory which he argues is revealing of a fundamental truth about the deep structure of the universe. The Law is embodied in a very specific pattern of oscillation that accompanies change and evolution. It can be found in fluctuations in stock markets and in economic activity. The research here suggests that the pattern was known about in antiquity because it was buried in a short passage in St Matthew's Gospel in the Bible. It also suggests that it was known about in the early part of the 20th century because it was concealed in the structure of books written by the renowned stock market trader William D. Gann and by the mindfulness exponent George Gurdjieff. Both men chose to preserve their knowledge of the pattern in a hidden form for some unknown future purpose. Now, after 20 years of investigation, Tony Plummer tells the story of how the pattern was originally hidden. Drawing on painstaking research on gematria, the enneagram and financial market analysis, Plummer reveals the existence of a behavioural pattern that may have profound implications for the way that we view the world. Plummer's work is elegantly structured and illustrated throughout. It is an exciting and thought-provoking study for Gann enthusiasts and also for investors, economists and scientists who have an interest in the laws that underpin systemic coherence and produce collective order.
