human dimension to their operations if they hope to improve production and safety performance While organisational safety
culture is a key determinant of workplace safety it is also essential to focus on the non technical skills of the system operators
based at the sharp end of the organisation These skills are the cognitive and social skills required for efficient and safe
operations often termed Crew Resource Management CRM skills In industries such as civil aviation it has long been
appreciated that the majority of accidents could have been prevented if better non technical skills had been demonstrated by
personnel operating and maintaining the system As a result the aviation industry has pioneered the development of CRM
training Many other organisations are now introducing non technical skills training most notably within the healthcare sector
Safety at the Sharp End is a general guide to the theory and practice of non technical skills for safety It covers the
