Gadamer In Conversation:

Gadamer in Conversation Hans-Georg Gadamer, Carsten Dutt, Glenn W. Most, 2001-01-01 This volume presents six lively conversations with Hans Georg Gadamer born 1900 one of the twentieth century's master philosophers Looking back over his life and thought Gadamer takes up key issues in his philosophy addresses points of controversy and replies to his critics including those who accuse him of having been in complicity with the Nazis A genial and direct conversationalist Gadamer is here captured at his best and most accessible The interviews took place between 1989 and 1996 and all but one appear in English for the first time in this volume The first three conversations conducted by Heidelberg philosopher Carsten Dutt deal with hermeneutics aesthetics and practical philosophy and the question of ethics In a fourth conversation with University of Heidelberg classics professor Glenn W Most Gadamer argues for the vital importance of the Greeks for our contemporary thinking In the next the philosopher reaffirms his connection with phenomenology and clarifies his relation to Husserl and Heidegger in a conversation with London philosopher Alfons Grieder In the final interview with German Nazi expert Dorte von Westernhagen Gadamer describes his life Gadamer's Hermeneutics and the Art of Conversation Andrzej Wierciński, 2011 Gadamer's Hermeneutics and the Art of Conversation covers the nature of dialogue and understanding in Hans Georg Gadamer's linguistically oriented hermeneutics and its relevance for contemporary philosophy This timely collection of essays stresses the fundamental significance of the other for a further development of Heidegger's analytics of Dasein By recognizing the priority of the other over oneself Gadamerian hermeneutics founds a culture of dialogue sorely needed in our multi-cultural globalized community The essays solicited for this volume are presented in three thematic blocks Hermeneutic Conversation Hermeneutics Aesthetics and Transcendence Hermeneutic Ethics Education and Politics The volume proposes a dynamic understanding of hermeneutics as putting into practice the art of conversation *A Century of Philosophy* Hans-Georg Gadamer, 2006-02-27 A philosophical and historical testament to the twentieth century this volume consists of a wide-ranging series of interviews conducted in 1999-2000 between the then centenarian and his former assistant and associate of over thirty years Riccardo Dottori These ten dialogues distill and situate Gadamer's philosophy in the context of what has arguably been the bloodiest century in human history In the course of the interviews Gadamer addresses often critically the work of a wide variety of philosophers including Heidegger Nietzsche Jaspers Popper Vico Habermas Rorty and Derrida He also elaborates on German philosophy during the Nazi period and in one of the more fascinating conversations we are treated to a glimpse of Gadamer's personal perspective on the question of Heidegger's Nazism including a discussion of the political influence that great philosopher's wife Elfriede had on him that tends to contradict most other published accounts With the possible exception of his autobiography 1985 *A Century of Philosophy* is perhaps the most accessible expression of Gadamer's life and work in English today Translation and Translanguaging Mike Baynham, Tong King Lee, 2019-06-11 Translation and Translanguaging brings into dialogue translanguaging as a theoretical lens and translation as an applied

practice This book is the first to ask what can translanguaging tell us about translation and what can translation tell us about translanguaging Translanguaging originated as a term to characterize bilingual and multilingual repertoires This book extends the linguistic focus to consider translanguaging and translation in tandem across languages language varieties registers and discourses and in a diverse range of contexts everyday multilingual settings involving community interpreting and cultural brokering embodied interaction in sports text based commodities and multimodal experimental poetics

Characterizing translanguaging as the deployment of a spectrum of semiotic resources the book illustrates how perspectives from translation can enrich our understanding of translanguaging and how translanguaging with its notions of repertoire and the moment can contribute to a practice based account of translation Illustrated with examples from a range of languages including Spanish Chinese Japanese Czech Lingala and varieties of English this timely book will be essential reading for researchers and graduate students in sociolinguistics translation studies multimodal studies applied linguistics and related areas

Heidegger and the Lived Experience of Being a University Educator Joshua Spier, 2018-02-09 This book explores the lived meanings of being a university educator from an existential perspective The book enriches our understanding of educators experiences in light of Martin Heidegger s early philosophy and vice versa opening our understanding of Heidegger s philosophy through educators experiences Also drawing on the philosophical insights of Hans Georg Gadamer the book situates the purposes and experiences of the educator in historical and contemporary contexts In doing so the author reveals that being a university educator is essentially characterised by conversation and time Inspired by the author s own experiences of teaching community development and sociology within a youth work specific bachelor degree the book invites educators to apply existential philosophy as a tool to reflect upon their own experiences and to reconnect with the question of what it means to be an educator in their shared world of practice This thoughtful volume is sure to resonate with the experiences of readers who educate within a university context

Understanding Other Religions Kemal Ataman, 2008 **The Utopian Human Right to Science and Culture** Anna Maria Andersen Nawrot, 2016-03-03 This book explores the question of whether the ideal right to science and culture exists It proposes that the human right to science and culture is of a utopian character and argues for the necessity of the existence of such a right by developing a philosophical project situated in postmodernity based on the assumption of thinking in terms of excedence The book brings a novel and critical approach to human rights in general and to the human right to science and culture in particular It offers a new way of thinking about access to knowledge in the postanalogue postmodern society Inspired by twentieth century critical theorists such as Levinas Gadamer Bauman and Habermas the book begins by using

excellence as a way of thinking about the individual speech and text. It considers paradigms arising from postanalogue society revealing the neglected normative content of the human right to science and culture and proposes a morality dignity and solidarity situated in a postmodern context. Finally the book concludes by responding to questions on happiness dignity and that which is social. Including an Annex which presents the author's private project related to thinking in the context of the journey from myth to reason this book is of interest to researchers in the fields of philosophy and the theory of law human rights intellectual property and social theory.

Incommensurability and Cross-Language Communication Xinli Wang, 2017-05-15 A dominant epistemological assumption behind Western philosophy is that it is possible to locate some form of commonality between languages traditions or cultures such as a common language or lexicon or a common notion of rationality which makes full linguistic communication between them always attainable. Xinli Wang argues that the thesis of incommensurability challenges this assumption by exploring why and how linguistic communication between two conceptually disparate languages traditions or cultures is often problematic and even unattainable. According to Wang's presuppositional interpretation of incommensurability the real secret of incommensurability lies in the ontological set ups of two competing presuppositional languages. This book provides many original contributions to the discussion of incommensurability and related issues in philosophy and offers valuable insights to scholars in other fields such as anthropology communication linguistics scientific education and cultural studies.

The Middle Voice in Gadamer's Hermeneutics Philippe Eberhard, 2004 Revised thesis Ph D University of Chicago Divinity School Chicago 2002 Critical Conversations Murray Rae, 2012-01-18 Critical Conversations provides a series of theological engagements with the work of Michael Polanyi one of the twentieth century's most profound philosophers of science. Polanyi's sustained explorations of the nature of human knowing open a range of questions and themes of profound importance for theology. He insists on the need to recover the categories of faith and belief in accounting for the way we know and points to the importance of tradition and the necessity sometimes of conversion in order to learn the truth of things. These themes are explored along with Polanyi's social and political thought his anthropology his hermeneutics and his conception of truth. Several of the essays set Polanyi alongside the work of other thinkers particularly Karl Barth Lesslie Newbigin Hans Georg Gadamer and Rene Girard and they discuss points of comparison and contrast between the respective figures. While all the essays are appreciative of Polanyi's contribution they do not shy away from critical analysis and take further therefore the critical appreciation of Polanyi's work.

Dostal, 2022-01-15 In Gadamer's Hermeneutics Robert J Dostal provides a comprehensive and critical account of Hans Georg Gadamer's hermeneutical philosophy arguing that Gadamer's enterprise is rooted in the thesis that being that can be understood is language He defends Gadamer against charges of linguistic idealism and emphasizes language's relationship to understanding though he criticizes Gadamer for too often ignoring the role of the prelinguistic in our experience Dostal goes on to explain the concept of the inner word for Gadamer's account of language The book situates Gadamer's hermeneutics in three important ways in relation to the contestability of the legacy of the Enlightenment project in relation to the work of his mentor Martin Heidegger and in relation to Gadamer's reading of Plato and Aristotle Dostal explores both Gadamer's claim on the Enlightenment and his ambivalence toward it He considers Gadamer's dependence on Heidegger's accomplishment while pointing out the ways in which Gadamer charted his own course rejecting his teacher's reading of Plato and his antihumanism Dostal points out notable differences in the philosophers' politics as well Finally Dostal mediates between Gadamer's hermeneutics and what might be called philological hermeneutics His analysis defends the civic humanism that is the culmination of the philosopher's hermeneutics a humanism defined by moral education common sense judgment and taste Supporters and critics of Gadamer's philosophy will learn much from this major achievement **Computational Social Science** Dan Dobrota, Roshan Chitrakar, Maria Ciurea, Liliana Măță, Wei Luo, 2022-07-01 The proceedings publish selected papers from the 2nd International Conference on New Computational Social Science focusing on the following five aspects Big data acquisition and analysis Integration of qualitative research and quantitative research Sociological Internet experiment research Application of ABM simulation method in Sociology Research Research and development of new social computing tools With the rapid development of information technology especially sweeping progress in the Internet of things cloud computing social networks social media and big data social computing as a data intensive science is an emerging field that leverages the capacity to collect and analyze data with an unprecedented breadth depth and scale It represents a new computing paradigm and an interdisciplinary field of research and application A broad comprehension of major topics involved in social computing is important for both scholars and practitioners This proceedings presents and discusses key

Assimilation/generation/resurrection Ben A. Heller, 1997 Cuban author Jose Lezama Lima 1910-76 produced some of the most enigmatic and important poetry in the Spanish language He did this during a turbulent moment in Cuban history a period of social unrest radical change in political systems and attempts at cultural self definition While some have argued that his poetry evades these circumstances Assimilation Generation Resurrection adopts a contextual approach and reveals the extent of Lezama s engagement with the defining political and cultural issues of his day It also lays bare the underlying connection of this poetry to a weave of intertexts Lezama s productive interaction with several traditions Intimidating in its philosophical scope and linguistic complexity Lezama s poetry has received far less critical attention than his prose The present study rectifies this critical imbalance foregrounding the poetry while discussing three issues that link disparate areas of Lezama s literary production These issues cultural assimilation generation and resurrection are central elements in Lezama s poetics yet are also pertinent to wide ranging debates on Latin American cultural identity This study reads key poems from each of his published books of poetry using an interpretive approach forged from diverse yet cohering sources including Lezama s own theories on reading and writing

After a brief methodological excursus and a first contextualization of Lezama's poetics vis à vis a number of other Cuban writers this study considers Lezama's early assimilation of a number of initiatory texts as well as his indirect but crucial response to the social concerns of the 1930s Assimilation Generation Resurrection makes clear that Lezama's poetry owes its existence to an engagement with cultural artifacts and social circumstances more generally Yet it is far more than a response It constantly attempts to go beyond generating the new at the intersection of the old and the as yet uncreated The result of this practice is a poetry that claims the power both to translate over distance and to resurrect by virtue of the image

Gadamer's Ethics of Play Monica Vilhauer, 2010-09-25 Gadamer's *Ethics of Play: Hermeneutics and the Other* examines the ethical dimensions of understanding by focusing on Gadamer's concept of play as it is developed in his magnum opus *Truth and Method*. Monica Vilhauer argues for the global relevance of play in Gadamer's philosophical hermeneutics by revealing play as the key concept that depicts the process of all understanding that is the dynamic dialogical and interpretive process by which interlocutors come to grasp a common subject matter together. Through the lens of dialogue play the book focuses on openness toward one's dialogue partner respect for his differing point of view and a willingness to learn from him in conversation as crucial ethical conditions of genuine understanding. The book aims to revive the ethical heart of philosophical hermeneutics and reveal the transforming power of the Other in Gadamer's hermeneutics. While Gadamer's *Ethics of Play* develops his philosophical hermeneutics as an ethical philosophy in the style of the older tradition of Aristotelian practical philosophy it is finally critical of the extent to which Gadamer's hermeneutics can be used as a guide to practice. The book points out our need for guidance when we face our most prevalent obstacle to understanding a closedness to the Other or unwillingness to engage in conversation but finds no guidance from Gadamer in scenarios where ethical conditions are lacking. Inspired by Gadamer's discussion of play the book searches for types of human interaction that might have the power to open or re-open the play of dialogue between those who have become closed to each other so that true understanding between them can be developed. The book is accessible to an undergraduate audience while also being relevant to ongoing debates among Gadamer scholars.
