*Gaetano Pesce* France Vanlaethem,1989      **Gaetano Pesce** Musée des arts décoratifs (France),      **Gaetano Pesce** France Vanlaethem,1989      *Gaetano Pesce* Marisa Bartolucci,2003-04 In an introduction to the catalogue of his first art exhibition in 1956 when a mere seventeen he brashly declared his right to be incoherent He still lives and labors by this youthful credo believing that today to be means to live in infinite and often contradictory ways      *Gaetano Pesce: The Complete Incoherence* Gaetano Pesce,Glenn Adamson,2022-11-15 The definitive volume on Gaetano Pesce s incomparable life and career as told in the iconoclastic artist designer s own words In a category all his own Gaetano Pesce is widely considered one of the most important and elusive creative figures of the last half century Bridging numerous key art and design movements while never truly belonging to any of them Pesce s singular practice has remained steadfastly provocative defying widely held notions of convention utility and good taste Yet as New York magazine demonstrated in its feature on the Pope of Gloop upon the opening of his recent solo show at acclaimed gallery Salon 94 the world has arguably caught up to Gaetano Pesce Now in his eighth decade Pesce recounts his life and career to renowned design curator and critic Glenn Adamson generating discussion conducted over several years that is as informative as it is surprising Discussing his incomparable decades long career which includes the creation of the classic articles of his UP series the effusively postmodern design for Chiat Day s headquarters and countless works of furniture and design objects in his signature poured resin Pesce shares his wide ranging thoughts on art design and architecture Always forward looking Pesce s process of reinterpreting and transforming the premises of modern design to create idiosyncratic and deeply personal works beat a path for multidisciplinary design practice seen everywhere today Particularly in his exploration of introducing imperfections if not defects into the traditionally uniform systems of mass fabrication Pesce turns out to be much more of a prophet of modern design than a curious detractor Gaetano Pesce *The Complete Incoherence* is the long overdue summary of an irreverent wildly inventive career that should inspire practitioners across all creative disciplines      **Out in the World with Gaetano Pesce** Museum,2021-04-26 At 81 the Italian designer and architect Gaetano Pesce is one of the world s greatest living innovators Best known for his radical embrace of ordinary unconventional materials of his time he has constructed enormous pink buildings from foam sofas that resemble jester hats large scale portraits from hand poured resin and vases that bend and wobble A pioneer in design he s advocated for decades for the injection of human elements and error into mass produced design This book is the first of its kind on Pesce now in the twilight years of his career It includes an interview with Pesce come essay by the critic Sophie Haigney intimate portraits by Duane Michals and four newly commissioned photographic series that take his work out into the world allowing different image makers to understand and connect with it for themselves      **The Inhabitable Flesh of Architecture** Marcos Cruz,2017-03-02 Today s architecture has failed the body with its long heritage of purity of form and aesthetic of cleanliness A resurgence of interest in flesh especially in art has led to a politics of

abjection completely changing traditional aesthetics and is now giving light to an alternative discussion about the body in architecture This book is dedicated to a future vision of the body in architecture questioning the contemporary relationship between our Human Flesh and the changing Architectural Flesh Through the analysis and design of a variety of buildings and projects Flesh is proposed as a concept that extends the meaning of skin one of architecture s most fundamental metaphors It seeks to challenge a common misunderstanding of skin as a flat and thin surface In a time when a pervasive discourse about the impact of digital technologies risks turning the architectural skin ever more disembodied this book argues for a thick embodied flesh by exploring architectural interfaces that are truly inhabitable Different concepts of Flesh are investigated not only concerning the architectural and aesthetic but also the biological aspects The latter is materialised in form of Synthetic Neoplasms which are proposed as new semi living entities rather than more commonly derived from scaled up analogies between biological systems and larger scale architectural constructs These neoplastic creations are identified as partly designed object and partly living material in which the line between the natural and the artificial is progressively blurred Hybrid technologies and interdisciplinary work methodologies are thus required and lead to a revision of our current architectural practice

**Architectures of Hiding** Rana Abughannam,Émélie Desrochers-Turgeon,Pallavi Swaranjali,Federica Goffi,2024-01-31 Architecture manifests as a space of concealment and unconcealment lethe and al theia enclosure and disclosure where its making and agency are both hidden and revealed With an urgency to amplify narratives that are overlooked silenced and unacknowledged in and by architectural spaces histories and theories this book contends the need for a critical study of hiding in the context of architectural processes It urges the understanding of inherent opportunities power structures and covert strategies whether socio cultural geo political environmental or economic as they are related to their hideoscapes the constructed landscapes of our built environments participating in the architectures of hiding Looking at and beyond the intentions and agency that architects possess architectural spaces lend themselves as apparatuses for various forms of hiding and un hiding The examples explored in this book and the creative works presented in the interviews enclosed in the interludes of this publication cover a broad range of geographic and cultural contexts discursively disclosing hidden aspects of architectural meaning The book investigates the imaginative intrigue of concealing and revealing in design processes along with moral responsibilities and ethical dilemmas inherent in crafting concealment through the making and reception of architecture

**All Over the Map** Michael Sorkin, 2013-02-12 All Over the Map is an urgent response to the radical changes in contemporary architecture and the built environment witnessed in the twenty first century Characteristically polemic incisive and energetic these essays explore pressing questions of architectural and urban design and critical issues of public space and participation From New York to New Orleans the Amazon to Jerusalem Sorkin brings a critical eye to bear on a sweeping range of subjects Whether castigating the sorry performance of the architectural avant garde considering the nature of place in globalized culture or providing mock instructions for entering a high security environment these writings make a powerful and provocative case for architecture and urban design to re engage with the lives and societies from which they have become increasingly detached
