A quest which will prove as important to Peyton's own life as to the mysterious T.

Everest Media, 2022-07-28T22:59:00Z. Please note: This is a companion version, not the original book. Sample Book Insights 1. Levon Brooks, a charming and optimistic man, had been working as a night guard at the Santa Barbara Club in Macon, Mississippi. The early 90s were the club's heyday. Old school blues musicians still played at the more established juke joints, but the Santa Barbara lacked authenticity. 2. Brooksville, Mississippi, was a quiet old prairie town with old-fashioned homes softened by an even spread of shade. It was the home of the Santa Barbara, which provided the three men with a variety of marketable skills and a semi-steady income. 3. Justin Johnson, a man with schizophrenia, was able to walk past a sleeping man and enter the house where he found three-year-old Courtney Smith sleeping on the floor. He picked her up and left. It was that easy. 4. By the time William Smith came home between two and two-thirty a.m., Courtney was already gone. He saw his brother Tony asleep on the couch in front of a television now broadcasting static. He glanced into the girl's bedroom and noticed something amiss but didn't make much of it.

Murders without Bodies Robert J. Sullivan, 2020-10-01. Each and every year thousands of people go missing; over one-third of them are victims of murder, and their bodies are never recovered. These cases are seldom investigated, much less prosecuted, due to lack of evidence and lack of resolve by prosecutors. This book takes a deep dive into actual investigations and prosecutions of murders without bodies and is intended for those with interest in criminal investigation and risky prosecutions. The reader will learn the complexities of evidence identification, witness testimony, forensics, legal maneuvering, courtroom tactics, and the psychology of jury selection. Though many books

are written about murder investigation this book is unique as it delves into six actual real life cases from the initial missing person report through the murder investigation and ultimate prosecution of the killer The book chronicles the work of America's top no body murder prosecutor Cass Castillo This passionate prosecutor has dedicated his career to taking on the cases other prosecutors shun due to the unwritten rule of No body no crime Castillo has successfully prosecuted more bodiless homicides than any other prosecutor in the United States and has been called the Man who returns a voice to the voiceless Castillo's case files investigator's reports and interviews provide the foundation for this compelling and suspenseful compilation of Castillo's most significant works The book concludes with a very insightful chapter on the psychological issues surrounding what makes a good juror Jurors are the ultimate decision makers and having the ability to assess that person's bias personality and demeanor is key to a prosecutor's success In Castillo's own words he describes the character and psychological analyses he conducts on each potential juror and what drives his decisions on whether to accept or reject that prospective juror

An End To Murder Colin Wilson,Damon Wilson,2015-09-24 Creatively and intellectually there is no other species that has ever come close to equalling humanity's achievements but nor is any other species as suicidally prone to internecine conflict We are the only species on the planet whose ingrained habit of conflict constitutes the chief threat to our own survival Human history can be seen as a catalogue of cold hearted murders mindless blood feuds appalling massacres and devastating wars but with developments in forensic science and modern psychology and with raised education levels throughout the world might it soon be possible to reign in humanity's homicidal habits Falling violent crime statistics in every part of the world seem to indicate that something along those lines might indeed be happening Colin and Damon Wilson who between them have been covering the field of criminology for over fifty years offer an analysis of the overall spectrum of human violence They consider whether human beings are in reality as cruel and violent as is generally believed and they

explore the possibility that humankind is on the verge of a fundamental change that we are about to become truly civilised As well as offering an overview of violence throughout our history from the first hominids to the twenty first century touching on key moments of change and also indicating where things have not changed since the Stone Age they explore the latest psychological forensic and social attempts to understand and curb modern human violence To begin with they examine questions such as Were the first humans cannibalistic Did the birth of civilisation also lead to the invention of war and slavery Priests and kings brought social stability but were they also the instigators of the first mass murders Is it in fact wealth that is the ultimate weapon They look at slavery and ancient Roman sadism but also the possibility that our own distaste for pain and cruelty is no more than a social construct They show how the humanitarian ideas of the great religious innovators all too quickly became distorted by organised religious structures The book ranges widely from fifteenth century Baron Gilles de Rais Bluebeard the first known and possibly most prolific serial killer in history to Victorian domestic murder and the invention of psychiatry and Sherlock Holmes and the invention of forensic science from the fifteenth century Taiping Rebellion in China in which up to 36 million died to the First and Second World Wars and more recent genocides and instances of ethnic cleansing and contemporary terrorism They conclude by assessing the very real possibility that the internet and the greater freedom of information it has brought is leading gradually to a profoundly more civilised world than at any time in the past
