Comprehensive Physics XI , *HEAO Science Symposium Held at MSFC, May 8-9, 1979* Carroll Dailey, Wendell Johnson, 1979 **A Catalogue of Southern Peculiar Galaxies and Associations: Volume 1, Positions and Descriptions** Halton C. Arp, B. Madore, 1987-05-29 This is the largest sample yet compiled of over 6 000 disturbed galaxies observations of galaxies in collision galaxies exploding or ejecting material distorted galaxies and galaxies in near collision with each other Volume I contains positions in right ascension and declination galactic latitude and longitude and super galactic latitude and longitude accurate to 15 arcseconds The Hot Universe Katsuji Koyama, Shunji Kitamoto, Masayuki Itoh, 2012-12-06 The present decade is opening new frontiers in high energy astrophysics After the X ray satellites in the 1980 s including Einstein Tenma EXOSAT and Ginga several satellites are or will soon be simultaneously in orbit offering spectacular advances in X ray imaging at low energies ROSAT J Yohkoh as well as at high energies GRANAT in spectroscopy with increased bandwidth ASCA J SAX and in timing XTE While these satellites allow us to study atomic radiation from hot plasmas or energetic electrons other satellites study nuclear radiation at gamma ray energies CGRO associated with radioactivity or spallation reactions These experiments show that the whole universe is emitting radiation at high energies hence we call it the hot universe The hot universe preferentially emitting X and gamma rays provides us with many surprises and much information A symposium The Hot Universe was held in conjunction with the XXIIIrd General Assembly of the International Astronomical Union at Kyoto on August 26 30 in 1997 The proceedings are organized as follows Synthetic view of the hot universe is discussed in Section 1 Plasma and Fresh Nucleosynthesis Phenomena Timely discussions on the strategy for future missions Future Space Program are found in Section 2 Then the contents are divided into two major subjects the compact objects and thin hot diffuse plasmas Section 3 is devoted to the category of compact objects which includes white dwarfs neutron stars and gravitationally collapsed objects stellar mass black holes or active galactic nuclei

Beyond Einstein Gravity Salvatore Capozziello, Valerio Faraoni, 2010-10-27 Beyond Einstein s Gravity is a graduate level introduction to extended theories of gravity and cosmology including variational principles the weak field limit gravitational waves mathematical tools exact solutions as well as cosmological and astrophysical applications The book provides a critical overview of the research in this area and unifies the existing literature using a consistent notation Although the results apply in principle to all alternative gravities a special emphasis is on scalar tensor and f R theories They were studied by theoretical physicists from early on and in the 1980s they appeared in attempts to renormalize General Relativity and in models of the early universe Recently these theories have seen a new lease of life in both their metric and metric affine versions as models of the present acceleration of the universe without introducing the mysterious and exotic dark energy The dark matter problem can also be addressed in extended gravity These applications are contributing to a deeper understanding of the gravitational interaction from both the theoretical and the experimental point of view An

extensive bibliography guides the reader into more detailed literature on particular topics
