published in English in 1986 these volumes are far more than the story of the life of a powerful statesman The name Bismarck sums up the entire political social economic and intellectual development of central Europe in the second half of the 19th Century and the internal and external shape that Germany then assumed These books analyse how much of this was Bismarck s personal achievement or whether he was the man who put the nation on the disastrously wrong course that reached its fateful culmination in 1933 They examine whether Bismarck s success was precisely because he implemented policies for which the time was ripe and did so in ways that were in harmony with the historical evolution of central Europe

The Publishers' Circular and Booksellers' Record ,1928      The Laser Disc Newsletter ,1998      The Eclectic Medical Journal ,1853      The Middle Ages at Work K. Robertson,M. Uebel,2016-04-30 This timely volume examines the commitments of historicism in the wake of New Historicism It contributes to the construction of a materialist historicism while at the same time proposing that discussions of work need not be limited to the clash between labour and capital To this end the essays offer more than a strictly historical view of the complex terms social and literary within which labour was treated in the medieval period Several of the essays strive to reformulate the very critical language we use to think about the categories of labour and work through a continually doubled engagement with modern theories of labour and medieval theories and practices of labour      *Publishers' Circular and Booksellers' Record of British and Foreign Literature* ,1900
