for a more integrated dynamic and equitable North America      *Attack Politics* Emmett H. Buell Jr., Lee Sigelman, 2009-09-01

This second edition of *Attack Politics* updates Emmett Buell and Lee Sigelman's highly regarded study of negativity in presidential campaigns since 1960 with a substantial new chapter on the 2008 contest between Barack Obama and John McCain. That campaign the authors contend proved to be the least negative in the last half century and reinforces their central argument that these campaigns have actually not grown dirtier and more negative since the election of JFK. In this new edition Buell and Sigelman address the same questions that guided their research in the original book: Who attacked whom? How frequently? On what issues? In what ways? And at what point in the race? They also update their analysis of whether presidential campaigns have gotten more negative since 1960, whether opposing sides addressed the same issues or avoided subjects owned by the other side, and whether trailing candidates wage more negative campaigns than leading candidates. The authors expand their analysis well beyond their original research base: 17,000 campaign statements extracted from nearly 11,000 news items in the *New York Times* focusing on both presidential and vice presidential nominees as sources and targets of attacks, and examining the actions of surrogate campaigners. They also compare their findings with previously published accounts of these campaigns, including firsthand accounts by candidates and their confidants. Each chapter features echoes from the campaign trail that reflect the invective exchanged by rival campaigns. Their new chapter shows that rather than neatly resembling either of their typology's extremes, runaways or dead heats, the 2008 race began as a dead heat in late summer but began to take on all the characteristics of a somewhat competitive affair by the end of September. Campaign discourse that began with an anticipated focus on the Iraq War and other national security issues came to be dominated by concerns about the economic meltdown. As the campaign headed toward the home stretch, anxiety about the economy seemed to eclipse national security, health care, immigration, and other concerns. This shift of emphasis, they argue, doomed whatever chance McCain had of winning. Like the first edition, this update of *Attack Politics* systematically analyzes negative campaigning, pinning down much that has previously been speculated on but left unsubstantiated. It offers the best overview yet of modern presidential races and remains must reading for anyone interested in the vagaries of those campaigns.

*The Great Risk Shift* Jacob S. Hacker, 2006-10-09

America's leaders say the economy is strong and getting stronger. But the safety net that once protected us is fast unraveling. With retirement plans in growing jeopardy while health coverage erodes more and more, economic risk is shifting from government and business onto the fragile shoulders of the American family. In *The Great Risk Shift*, Jacob S. Hacker lays bare this unsettling new economic climate, showing how it has come about, what it is doing to our families, and how we can fight back. Behind this shift, he contends, is the Personal Responsibility Crusade eagerly embraced by corporate leaders and Republican politicians who speak of a nirvana of economic empowerment, an ownership society in which Americans are free to choose. But as Hacker reveals, the result has been quite different: a harsh new world of economic insecurity in which far too many Americans are free to lose. The book

documents how two great pillars of economic security the family and the workplace guarantee far less financial stability than they once did The final leg of economic support the public and private benefits that workers and families get when economic disaster strikes has dangerously eroded as political leaders and corporations increasingly cut back protections of our health care our income security and our retirement pensions Blending powerful human stories big picture analysis and compelling ideas for reform this remarkable volume will hit a nerve serving as a rallying point in the vital struggle for economic security in an increasingly uncertain world

**The Great Turning ,      Hegemony Constrained** Davis B. Bobrow,2008-05-25 In the post cold war era the United States has risen to a position of unprecedented dominance in the world and has often pursued a primarily unilateral approach to international policy issues Hegemony Constrained examines how nations ethnic and religious groups and international organizations cope with American hegemony The chapters reveal the various ways in which foreign actors attempt and sometimes succeed in keeping official Washington from achieving its preferred outcomes An international group of contributors considers how and why a variety of foreigners act strategically to avoid delay or change American policy with respect to a broad range of issues in world affairs Individual chapters analyze the Kurds and Shia in Iraq the governments of China Japan Turkey and Germany the G 7 liberalizing the international economy coping with global warming regulating harmful tax competition controlling missile proliferation limiting public health damage from tobacco and international public opinion bearing on the politics of responding to a hegemonic America By recognizing and illustrating moves that challenge American unilateralism Hegemony Constrained provides a framework for understanding and anticipating the goals motives and means others in the world bring to their dealings with American hegemony in specific situations Thus it offers a corrective to naively optimistic unilateralism and naively optimistic multilateralism
