Games and Sets Steven Barnett,1990 No Marketing Blurb *Advanced Studies in Media* Joe Nicholas,John Price,1998
Advanced Studies in Media has been designed to offer a comprehensive and stimulating textbook for all students on advanced level media studies and communications studies courses The Transformation of Television Sport M. Milne,2016-04-08 The Transformation of Television Sport New Methods New Rules examines how developments in technology broadcasting rights and regulation combine to determine what sport we see on television where we can see it and what the final output looks and sounds like **Sport and Mediatization** Kirsten Frandsen,2019-11-05 Contemporary society is highly media saturated and no sector more so than sport Drawing on case studies from the Tour de France to fitness apps this book introduces the concept of mediatization and examines how media historically and currently are significant drivers for social and cultural change in sport Utilizing different analytical approaches case studies illustrate how so called legacy media have historically been involved in the establishment of the institution of sport and have persistently been heavily involved in structural changes in the same domain However digital media currently add significantly to the development of a more complex picture of globalized interdependencies and still growing media presence in all aspects of the everyday lives of both sporting organizations athletes and audiences fans The book seeks to eschew media centrism acknowledging that changes are not only driven by media but also related to other macro social forces of change such as globalization commercialization and individualization Offering a new analytical framework Sport and Mediatization enables students and scholars in the transdisciplinary field of media and sports studies to analyze and understand the influence of media in a much more complex environment **The Commercialisation of Sport** Trevor Slack,2004-03-01 What does commercialisation mean for the future of sport Modern sports links to commerce are highly visible Stadiums and arenas bear the names of businesses while sponsors logos appear on athletes clothing and equipment on the facilities in which they play and in the titles of the events in which they compete Media companies pay vast sums for the rights to broadcast sports events and advertisers pay a premium to promote products during the screening of these events Cities invest at the expense of other social projects in the staging of major sports events and to attract professional teams to their areas Star athletes are transferred for multi million fees and professional sport franchises are sold for sums higher than the gross domestic products of some countries Even recreational athletes are subject to a constant barrage of commercial pressures to improve their game Sport s links to commerce have intensified over the past 30 years but have been subjected to little academic analysis This book represents an attempt to fill that significant gap in the literature by examining five different aspects of the commercialisation of sport The sports industry The public sector The commercialisation of amateur sport Sport and television Sports sponsorship There has been a rapid and widespread commercialisation of sport and it is vital that we now raise critical questions and analyse the changes that have taken place Making Sense of Sports Ellis Cashmore,2002-01-04
