valuable lessons 22yearold Garry Kasparov became the youngest World Chess Champion in history His win was not only hailed as a triumph of imaginative attacking chess but also as a political victory The representative of perestroika had beaten the old champion a symbol of Soviet stagnation Kasparov defended his title in three more matches all of them full of drama Karpov remained a formidable opponent and the overall score was only 7371 in Kasparov s favour In The Longest Game Jan Timman returns to the KasparovKarpov matches He chronicles the many twists and turns of this fascinating saga including his behindthe scenes impressions and takes a fresh look at the games

Play Like a World Champion F. M. Bill Jordan, 2019-08-11 Introduction This book is similar to Rate Your Chess and Rate Your Chess 2 which proved surprisingly popular It uses a system developed by FIDE master Bill Jordan for coaching This book features Anatoly Karpov who became world chess champion in 1975 after winning by default in 1975 Karpov was from the Soviet Union Karpov was a great positional and endgame player How many of his moves can you guess Playing through Games Playing through master games is a proven method of improving One method is to take one side usually the winning side and guess the next move In the pre computer era this could be done by covering up the moves with a sheet of

cardboard If you guessed correctly you will score With practice you will correctly predict more moves Doing so helps develop chess fluency One suggested approach was not to take too long on the moves say about 10 seconds or so You could score correct guesses If the move was totally unexpected then it would be a good time to see if you could understand why the move was played Every move should have a clear idea behind it If you cannot see the idea there is a learning opportunity there Here there is between one and four choices This is similar to a multiple choice exam This is easier than looking at all moves and may mean you examine some moves you would not have normally considered Diagrams This book has many large clear colour diagrams You do not need a chess set and board to read this book You do need to know how to read standard chess notation How to Score This book consists of games from World Championships with brief annotations for each move You may simply play over the games for their own sake To get the most out of this book you play through the games and take the role of the winning player The winning player will always be playing up the board Initially all the details of the games will be displayed For a number of opening moves you will not need to guess the move The number will vary from game to game and will generally be between 8 and 10 moves for each side After these opening moves have been played you will then try and predict the winning player's moves Your choice will be selected from a number of candidate moves If you guess correctly you will score points which will range from 0 to 6 You can either write down or otherwise keep track of your total score and see what category you reach Rating The score for each game will always be out of 100 Scores may vary from game to game so to get a consistent rating average your score over 10 games These are based on the FIDE The international chess federation rating system developed by Professor Elo The rating of 2500 is an approximation of the strength needed to be a Grandmaster After you have finished a game find what range your score is in the left column Your approximate rating is in the right column
