Garbage Wars The Struggle For Environmental Justice In Chicago:

Garbage Wars David Naguib Pellow, 2004-09-17 A study of the struggle for environmental justice focusing on conflicts over solid waste and pollution in Chicago In *Garbage Wars* the sociologist David Pellow describes the politics of garbage in Chicago He shows how garbage affects residents in vulnerable communities and poses health risks to those who dispose of it He follows the trash the pollution the hazards and the people who encountered them in the period 1880 2000 What unfolds is a tug of war among social movements government and industry over how we manage our waste who benefits and who pays the costs Studies demonstrate that minority and low income communities bear a disproportionate burden of environmental hazards Pellow analyzes how and why environmental inequalities are created He also explains how class and racial politics have influenced the waste industry throughout the history of Chicago and the United States After examining the roles of social movements and workers in defining resisting and shaping garbage disposal in the United States he concludes that some environmental groups and people of color have actually contributed to environmental inequality By highlighting conflicts over waste dumping incineration landfills and recycling Pellow provides a historical view of the garbage industry throughout the life cycle of waste Although his focus is on Chicago he places the trends and conflicts in a broader context describing how communities throughout the United States have resisted the waste industry s efforts to locate hazardous facilities in their backyards The book closes with suggestions for how communities can work more effectively for environmental justice and safe sustainable waste management

Pathways to the Present Mansel G. Blackford, 2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam *Pathways to the Present* is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south

Barandiaran, 2018-07-31 The politics of scientific advice across four environmental conflicts in Chile when the state acted as a neutral broker rather than protecting the common good In *Science and Environment in Chile* Javiera Barandiaran examines the consequences for environmental governance when the state lacks the capacity to produce an authoritative body of knowledge Focusing on the experience of Chile after it transitioned from dictatorship to democracy she examines a series of environmental conflicts in which the state tried to act as a neutral broker rather than the protector of the common good She argues that this shift in the role of the state occurring in other countries as well is driven in part by the political ideology of neoliberalism which favors market mechanisms and private initiatives over the actions of state agencies Chile has not invested in environmental science labs state agencies with in house capacities or an ancillary network of trusted scientific advisers despite the growing complexity of environmental problems and increasing popular demand for more active environmental stewardship Unlike a high modernist empire state with the scientific and technical capacity to undertake large scale projects Chile's model has been that of an umpire state that purchases scientific advice from markets After describing the evolution of Chilean regulatory and scientific institutions during the transition Barandiaran describes four environmental crises that shook citizens trust in government the near collapse of the farmed salmon industry when an epidemic killed millions of fish pollution from a paper and pulp mill that killed off or forced out thousands of black neck swans a gold mine that threatened three glaciers and five controversial mega dams in Patagonia *Latinos in the American Political System*

political processes and institutions from the perspective of liberals and conservatives alike **Encyclopedia of Consumption and Waste** Carl A. Zimring, William L. Rathje, Consulting Editor, 2012-02-27 Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations but examining what we throw away today tells a story in real time and becomes an important and useful tool for academic study Trash is studied by behavioral scientists who use data compiled from the exploration of dumpsters to better understand our modern society and culture Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis How do different societies around the world cope with their garbage in these troubled environmental times How does our trash give insight into our attitudes about gender class religion and art The Encyclopedia of Consumption and Waste explores the topic across multiple disciplines within the social sciences and ranges further to include business consumerism environmentalism and marketing to comprise an outstanding reference for academic and public libraries

Environmentalism of the Rich Peter Dauvergne, 2018-02-09 What it means for global sustainability when environmentalism is dominated by the concerns of the affluent eco business eco consumption wilderness preservation Over the last fifty years environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization colonialism and globalization Activists and policymakers have fought hard to make the earth a better place to live But has the environmental movement actually brought about meaningful progress toward global sustainability Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling While it is good that for example Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis More eco products can just mean more corporate profits consumption and waste Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever more more growth more sales more consumption is swamping environmental gains Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability **Inequality in the United States** John Brueggemann, 2020-11-25 For courses in Inequality Social Stratification and Social Problems A thoughtful compilation of readings on inequality in the United States The main objective of this text is to introduce students to the subject of social stratification as it has developed in sociology The central focus is

An examination of environmental revitalization efforts in low income communities in Boston Barcelona and Havana that help heal traumatized urban neighborhoods Environmental justice as studied in a variety of disciplines is most often associated with redressing disproportionate exposure to pollution contamination and toxic sites In *Neighborhood as Refuge* Isabelle Anguelovski takes a broader view of environmental justice examining wide ranging comprehensive efforts at neighborhood environmental revitalization that include parks urban agriculture fresh food markets playgrounds housing and waste management She investigates and compares three minority low income neighborhoods that organized to improve environmental quality and livability Casc Antic in Barcelona Dudley in the Roxbury section of Boston and Cayo Hueso in Havana Despite the differing histories and political contexts of these three communities Anguelovski finds similar patterns of activism She shows that behind successful revitalization efforts is what she calls bottom to bottom networking powered by broad coalitions of residents community organizations architects artists funders political leaders and at times environmental advocacy groups Anguelovski also describes how over time environmental projects provide psychological benefits serving as a way to heal a marginalized and environmentally traumatized urban neighborhood They encourage a sense of rootedness and of attachment to place creating safe havens that offer residents a space for recovery They also help to bolster residents ability to deal with the negative dynamics of discrimination and provide spaces for broader political struggles including gentrification Drawing on the cases of Barcelona Boston and Havana Anguelovski presents a new holistic framework for understanding environmental justice action in cities with the right to a healthy community environment at its core

Communicating Environmental Patriotism Anne Marie Todd,2013-06-07 Environmental patriotism the belief that the national environment defines a country s greatness is a significant strand in twentieth century American environmentalism This book is the first to explore the history of environmental patriotism in America through the intriguing stories of environmental patriots and the rhetoric of their speeches and propaganda The See America First movement began in 1906 with the aim of protecting and promoting the landscapes of the American West In 1908 Gifford Pinchot and President Theodore Roosevelt hosted the White House Conservation Conference to promote the wise use of natural resources for generations of Americans In 1912 Pittsburgh s smoke investigation condemned the effects of coal smoke on the city s environment In World War II a massive propaganda effort mobilized millions of Americans to plant victory gardens to save resources for the war abroad While these may not seem like crucial moments for the American environmental movement this new history of American environmentalism shows that they are linked by patriotism The book offers a provoking critique of environmentalists communication strategies and suggests patriotism as a persuasive hook for new ways to make environmental issues a national priority This original research should be of interest to scholars of

environmental communication environmental history American history and environmental philosophy **Flint Fights Back** Benjamin J. Pauli, 2019-05-07 An account of the Flint water crisis shows that Flint's struggle for safe and affordable water is part of a broader struggle for democracy. When Flint, Michigan, changed its source of municipal water from Lake Huron to the Flint River, Flint residents were repeatedly assured that the water was of the highest quality. At the switchover ceremony, the mayor and other officials performed a celebratory toast, declaring "Here's to Flint" and downing glasses of freshly treated water. But as we now know, the water coming out of residents' taps harbored a variety of contaminants, including high levels of lead. In *Flint Fights Back*, Benjamin Pauli examines the water crisis and the political activism that it inspired, arguing that Flint's struggle for safe and affordable water was part of a broader struggle for democracy. Pauli connects Flint's water activism with the ongoing movement protesting the state of Michigan's policy of replacing elected officials in financially troubled cities like Flint and Detroit with appointed emergency managers. Pauli distinguishes the political narrative of the water crisis from the historical and technical narratives, showing that Flint activists' emphasis on democracy helped them to overcome some of the limitations of standard environmental justice frameworks. He discusses the pro-democracy, anti-emergency manager movement and traces the rise of the water warriors, describes the uncompromising activist culture that developed out of the experience of being dismissed and disparaged by officials, and examines the interplay of activism and scientific expertise. Finally, he explores efforts by activists to expand the struggle for water justice and to organize newly mobilized residents into a movement for a radically democratic Flint.

Environments, Natures and Social Theory Damian White, Alan Rudy, Brian Gareau, 2017-09-16 From climate change to fossil fuel dependency, from the uneven effects of natural disasters to the loss of biodiversity, complex socio-environmental problems indicate the urgency for cross-disciplinary research into the ways in which the social, the natural, and the technological are ever more entangled. This ground-breaking text moves between environmental sociology and environmental geography, political and social ecology, and critical design studies to provide a definitive mapping of the state of environmental social theory in the age of the anthropocene. *Environments, Natures and Social Theory* provokes dialogue and confrontation between critical political economists, actor-network theorists, neo-Malthusians, and environmental justice advocates. It maps out the new environmental politics of hybridity, moving from hybrid neo-liberals to end-times ecologists, from post-environmentalists to cyborg eco-socialists. White, Rudy, and Gareau insist on the necessity of a critical but optimistic hybrid politics, arguing that a more just, egalitarian, democratic, and sustainable anthropocene is within our grasp. This will only be brought into being, however, by reclaiming, celebrating, and channeling the reconstructive potential of entangled hybrid humans as inventive hominids, creative gardeners, critical publics, and political agents. Written in an accessible style, *Environments, Natures and Social Theory* is an essential resource for undergraduate and postgraduate students across the social sciences.
