Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i.e. sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F. Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production **Does It Take A Village?** Alan Booth, Ann C. Crouter, 2001 In this volume experts from several social science disciplines explore the condition under which communities affect children's development and family functioning

Studying Minority Adolescents Vonnie C. McLoyd, Laurence Steinberg, 1998-07-01 In the burgeoning research literature on adolescents the relative paucity of work examining ethnic variations in developmental processes is a glaring gap particularly because approximately one third of American young people now come from an ethnic minority background A primary factor in this research imbalance has been the lack of training in methods and research instruments needed to properly study ethnically diverse populations This book was developed in response to this need Its chief objective is to present recent theoretical conceptual and methodological advances in the study of ethnicity and development during adolescence The chapters address fundamental and enduring issues concerning the incorporation of ethnicity into research designs Topics such as demographics ethnicity friendly research paradigms and practical challenges that arise throughout

the research cycle are addressed by scholars who have been there and learned how to successfully study the effects of race and ethnicity on developmental processes and outcomes Established scholars and newcomers to research working both in academic and applied settings with adolescents as their focus will find this book a valuable resource *Family Empowerment* Katherine Dunlap, 2019-06-04 First published in 2000 Routledge is an imprint of Taylor Consortium for Longitudinal Studies 1983 Deutsch Jordan Lazar Darlington 1982 This study considers positive benefits for caregivers who participate in cooperative preschool education Since not all caregivers are parents the study includes grandparents who have custody of children and kin with responsibility for kith

Neighborhood Poverty Jeanne Brooks-Gunn, Greg Duncan, J. Lawrence Aber, 1997-11-13 Perhaps the most alarming phenomenon in American cities has been the transformation of many neighborhoods into isolated ghettos where poverty is the norm and violent crime drug use out of wedlock births and soaring school dropout rates are rampant Public concern over these destitute areas has focused on their most vulnerable inhabitants children and adolescents How profoundly does neighborhood poverty endanger their well being and development Is the influence of neighborhood more powerful than that of the family Neighborhood Poverty approaches these questions with an insightful and wide ranging investigation into the effect of community poverty on children's physical health cognitive and verbal abilities educational attainment and social adjustment This two volume set offers the most current research and analysis from experts in the fields of child development social psychology sociology and economics Drawing from national and city based sources Volume I reports the empirical evidence concerning the relationship between children and community As the essays demonstrate poverty entails a host of problems that affects the quality of educational recreational and child care services Poor neighborhoods usually share other negative features particularly racial segregation and a preponderance of single mother families that may adversely affect children Yet children are not equally susceptible to the pitfalls of deprived communities Neighborhood has different effects depending on a child's age race and gender while parenting techniques and a family's degree of community involvement also serve as mitigating factors Volume II incorporates empirical data on neighborhood poverty into discussions of policy and program development The contributors point to promising community initiatives and suggest methods to strengthen neighborhood based service programs for children Several essays analyze the conceptual and methodological issues surrounding the measurement of neighborhood characteristics These essays focus on the need to expand scientific insight into urban poverty by drawing on broader pools of ethnographic epidemiological and quantitative data Volume II explores the possibilities for a richer and more well rounded understanding of neighborhood and poverty issues To grasp the human cost of poverty we must clearly understand how living in distressed neighborhoods impairs children's ability to function at every level Neighborhood Poverty explores the multiple and complex paths between community family and childhood development These two volumes provide an indispensable guide for social policy and demonstrate the power of interdisciplinary social science to probe complex social issues
