Sternberg,Elena L. Grigorenko,1997-01-28 The debate

over nature versus nurture in relation to intelligence is not as clearly drawn as it was ten years ago when geneticists claimed that intelligence is innate while environmentalists claimed that culture is the major determining factor. Although the debate has not been resolved it has been significantly refined. Robert Sternberg and Elena Grigorenko address the roles and interaction of nature and nurture in Intelligence Heredity and Environment. This book provides a comprehensive balanced current survey of theory and research on the origins and transmission of human intelligence. The book is unique in the diversity of viewpoints it presents and its inclusion of the very most recent theories and findings. It highlights the search for genes associated with specific cognitive abilities, interactionist theories, cultural relativism, educational strategies, developmental perspectives and fallacies of previous intelligence research.

Technology versus Ecology: Human Superiority and the Ongoing Conflict with Nature Schultz, Robert A., 2013-09-30. Although human beings are technically part of the ecosystem there still remains a conceptual conflict between technology and nature. These concerns highlight the idea of human superiority in which the priority is given to technology versus living in synchronization with nature. Technology versus Ecology: Human Superiority and the Ongoing Conflict with Nature explores the issues revolving around the conflict between technology versus human beings, the concern for the separation of human beings in the ecosystem and the negative consequences that may follow as ecosystems are being damaged. This book is a significant reference source for researchers, instructors and students interested in the constant evolution of technology and ecology.

**Human Intelligence and Medical Illness** R. Grant Steen, 2009-09-16. As critics will note, psychometric tests are deeply flawed. Person to person differences in performance on a psychometric test are not informative about many things of great interest. An intelligence quotient (IQ) cannot characterize creativity or wisdom or artistic ability or other forms of specialized knowledge. An IQ test is simply an effort to assess an aptitude for success in the modern world and individual scores do a mediocre job of predicting individual successes. In the early days of psychology tests of intelligence were cobbled together with little thought as to validity; instead the socially powerful sought to validate their power and the prominent to rationalize their success. In recent years we have obviated many of the objections to IQ that were so forcefully noted by Stephen Jay Gould in *The Mismeasure of Man*. Nevertheless IQ tests are still flawed and those flaws are hereby acknowledged in principle. Yet in the analysis that follows individual IQ test scores are not used; rather average IQ scores are employed. In many cases though not all an average IQ is calculated from a truly enormous sample of people. The most common circumstance for such large scale IQ testing is an effort to systematically sample all men of a certain age to assess their suitability for service in the military. Yet it is useful and prudent to retain some degree of skepticism about the ability of IQ tests to measure individual aptitudes.

*Savage Ecology* Jairus Victor Grove, 2019-08-16 Jairus Victor Grove contends that we live in a world made by war In *Savage Ecology* he offers an ecological theory of geopolitics that argues that contemporary global crises are better understood when considered within the larger history of international politics Infusing international relations with the theoretical interventions of fields ranging from new materialism to political theory Grove shows how political violence is the principal force behind climate change mass extinction slavery genocide extractive capitalism and other catastrophes Grove analyzes a variety of subjects from improvised explosive devices and drones to artificial intelligence and brain science to outline how geopolitics is the violent pursuit of a way of living that comes at the expense of others Pointing out that much of the damage being done to the earth and its inhabitants stems from colonialism Grove suggests that the Anthropocene may be better described by the term Eurocene The key to changing the planet's trajectory Grove proposes begins by acknowledging both the earth shaping force of geopolitical violence and the demands apocalypses make for fashioning new ways of living
