**Competition Law and Consumer Protection** Katalin Judit Cseres, 2005-01-01 The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged The theory seems uncontroversial However because a positive interaction between the two is presumed to be self evident the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis with no overarching legal authority There is a clear need for a detailed and coherent understanding

of exactly where the complements and tensions between the two policy areas exist Dr Cseres in depth analysis provides that understanding Proceeding from the dual perspective of law and economics that is of justice fairness and reasonableness on the one hand and of efficiency of the other she fully considers such underlying issues as the following the role of competition law and consumer law in a free market economy the notion of consumer welfare the effect of the modernisation of EC competition law for consumers economics theories of information bounded rationality and transaction costs the special significance of vertical agreements and merger control and how consumers are affected by information asymmetries The ultimate focus of the book is on current and emerging EC law in which a rapprochement between the two areas seems to be under way Dr Cseres provides a knowledgeable guide to the various strands of theory policy and jurisprudence that she shows ought to be taken into account in the process including schools of thought and law and policy experience in both Europe and the United States A special chapter on Hungary where post 1989 law and practice reveal a fresh and distinctly forward looking understanding of the matter is one of the book s most extraordinary features Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily It will be of immeasurable value to a wide range of professionals from academics and researchers to officials policymakers and practitioners in competition law consumer protection advocacy economic theory and planning business administration and various pertinent government authorities

Consumer Theories of Harm Paolo Siciliani,Christine Riefa,Harriet Gamper,2019-09-19 It has long been thought that fairness in European Consumer Law would be achieved by relying on information as a remedy and expecting the average consumer to keep businesses in check by voting with their feet This monograph argues that the way consumer law operates today promises a lot but does not deliver enough It struggles to avoid harm being caused to consumers and it struggles to repair the harm after the event To achieve fairness solutions need to be found elsewhere Consumer Theories of Harm offers an alternative model to assess where and how consumer detriment may occur and solutions to prevent it It shows that a more confident use of economic theory will allow practitioners to demonstrate how a poor standard of professional diligence lies at the heart of consumer harm The book provides both theoretical and practical examples of how to combine existing law with economic theory to improve case outcomes The book shows how public enforcers can move beyond the dominant transparency paradigm to an approach where firms have a positive duty to treat consumers fairly and shape their commercial offers in a way that prevents consumers from making mistakes Over time this fairness by design approach will emerge as the only acceptable way to compete **United States Reports** United States. Supreme Court,1988 **The American Influence on International Commercial Arbitration** Pedro J. Martinez-Fraga,2020-07-02 As in its first edition this book traces the contours of select US common law doctrinal developments concerning international commercial arbitration This new edition supplements the foundational work contained in the first edition in order to produce a broader and deeper work

The author explores how the US common law may help bridge cross cultural legal differences by focusing on the need to address these contrasting approaches through the nomenclature and goal of securing equality between party autonomy and arbitrator discretion in international commercial arbitration This book thus focuses on the common law development of arbitrator immunity as well as the precepts of party initiative and autonomy forming part of the US common law discovery rubric that may contribute to promoting expediency efficiency and transparency in international commercial arbitration proceedings It does so by carefully analyzing among other things the International Bar Association IBA Rules on Evidence Gathering the Prague Rules and the role of 28 USC 1782 in international arbitration      **Monthly Labor Review** ,1982-06 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews      Official Reports of the Supreme Court United States.
