Oxaal, Tony Barnett, David Booth, 2010-11-26 Conceived as a response to the economic naivety and implicit metropolitan bias of many 1950s and 60s studies of the sociology of development this volume first published in 1975 provides actual field studies and theoretical reviews to indicate the directions which a conceptually more adequate study of developing societies should take Much of the book reflects strongly the influence of Andre Gunder Frank but the contributors adopt a critical attitude to his ideas applying them in empirical situations within such African and American countries as Kenya Guyana Tanzania and Peru Others pursue the lines of enquiry opened up by Latin American theories of economic dependency and by the new school of French economic anthropology Africa, Latin America, and the Caribbean Sabella Ogbobode Abidde, 2018-03-01 As important as state to state and multi state cooperation have long proven to be many countries in the Global South have yet to fully explore its potentials Despite their shared history of slavery colonialism and underdevelopment Africa Latin America and the Caribbean currently show a lack of significant cooperation Africa Latin America and the Caribbean The Case for Bilateral and Multilateral Cooperation therefore makes the case for an increased and renewed effort at bilateral and multilateral cooperation between the three regions In this multidisciplinary work scholars make the case for renewing continuing and deepening relationships between the people the state and the non governmental organizations in the three spheres taking not only an economic and political point of view but also considering sociological geographical and historical perspectives as well *Latin America's International Relations and Their Domestic*

Africa in the Global Economy Gordon Moyo, 2024-03-22 This book discusses the role played by powerful global institutions such as the IMF the World Bank the World Trade Organisation multinational corporations and the international credit rating agencies in keeping Africa marginalised in the world economy The book focuses on the intrusive roles of these institutions as enablers and beneficiaries of capital outflows and financial subordination in Africa Diverging from the official narrative that touts China and the other emerging economies as global reformers that are poised to partner Africa in its fight against financial subjugation the book instead argues that like the Western powers the emerging economies are benefiting prodigiously from a rigged global financial system that keeps Africa as a net creditor to the rest of the world The book draws its theoretical framework from the repressed heterodox theories including dependency core periphery world systems and Marxist theories as well as the decolonial approach It concludes with a call for a decolonial African agency that should champion an epistemic rebellion against the neo liberal and neo classic economic traditions that have been historically deployed to justify Africa's subordinated position in the global economic governance This book comes at moment in time when Africa is ready to become a Rule Maker not a Rule Taker The analysis Dr Moyo presents having been in the front line of public policy and international negotiations demonstrate the need for Africa to re write the rules to foster our own Transformation Jason Rosario Braganza Executive Director African Forum and Network on Debt and Development AFRODAD

Third World Urbanization J. Abu-Lughod, R. Jr Hay, 2013-07-04 First published in 2006 Despite the growing significance of the Third World and the critical nature of its urbanization there are few synthetic books covering more than one region of the Third World which can be used either by scholars seeking an overview of the process of world urbanization or by students in the growing number of courses now being offered in the field of comparative urbanism The most distressing problem was that the field of urbanization particularly with reference to developing countries seemed to us to have stagnated at theoretically sterile conceptualizations or even worse had deteriorated into fragmented empirical descriptive reports whether observing with sympathy or noting with alarm the rapidly declining condition of individual cities This book attempts to rectify this deficiency

Economic Development and Environmental Sustainability Ramón López, Michael A. Toman, 2006-06-29 Economic growth as we know it today cannot persist indefinitely if it entails continuous degradation of natural resources and the environment While in a few countries around the world it appears that environmental degradation has been the result of rapid economic growth in the vast majority of the developing countries the environment has been equally spoiled despite slow or even negative economic growth This book provides new insights on the common roots of economic stagnation poverty and environmental degradation which unfortunately generally reside in misguided government policies and priorities By doing this the volume seeks to provide a broader policy option framework than those found in conventional policy analyses mainly dominated by the Washington Consensus It shows that a major omission of the conventional view is that governments tend to allocate government expenditures in a biased way favouring subsidies to the economic elites to the detriment of investments in public goods including human capital R D as well as the development of institutions environmental and otherwise which are vital for long run growth poverty reduction and environmental sustainability
