## **Economic Development Eec Economi:**

**The Economic Development of the EEC** Richard T. Griffiths, 1997 This authoritative volume traces the creation and development of the EEC as an institution and assesses its impact on the economic development of Europe and the policy areas under its control The book includes a thorough discussion of the background and origins of the European Economic Community In the early years of post war Europe the continuous search for a multilateral commercial agreement resulted in various plans for European commercial cooperation These schemes were proposed less in a desire for European integration and supranational institutions than in response to real economic problems and were the precursors to the formation of the EEC The next section investigates the process of creating the EEC including the road to integration of the major founding members and the attitude of the United States to European integration Finally it discusses the economic development of the EEC since 1957 It explores major themes including the impact of the Community on trade and agriculture and on competition and financial policy as well as the effects of its own enlargement The study ends with the steps towards closer union embodied in the Treaty of Maastricht which signalled the transformation of the European Economic Community into the European Union

**Technical Change and Economic Growth** George M. Korres, 1996 **Common Market & Economic Development** Stephen G. Triantis, 1965 **Economic Planning and Policies in Britain, France and Germany** Geoffrey Denton, Murray Forsyth, Malcolm MacLennan, 2017-06-14 This book originally published in 1968 contrasts the long history of national planning in France with the equally long history of anti planning ideology in Germany and by close examination of the actual policies brings out the realities that lie behind the public attitudes **Economic**

Economic Integration Worldwide Fritz Machlup,1976-01-01 *Bibliography of Agriculture* ,1974 **Economic Titles/abstracts** ,1988 **Political Leadership and the European Commission Presidency** Henriette Müller,2020 The EU s pluralistic nonhierarchical system of multilevel governance lacks clear structures of both government and opposition According to the EU treaties the presidency of the European Commission is thus not explicitly expected to exercise political leadership However the position cannot effectively be exercised without any demonstration of such leadership due to its many leadership functions Examining this curious mix of strong political demands weak institutional powers and need for political leadership this book systematically analyses the political leadership performance of the presidents of the European Commission throughout the process of European integration The basic argument is that Commission presidents matter not only in the process of European integration but that their impact varies according to how the different incumbents deal with the institutional structure and the situational circumstances and thus their available strategic choices The primary research question is thus What makes political leadership in European governance successful and to what extent and why do Commission presidents differ in their leadership performance In addressing this question this book departs from existing research on EU leadership which has to date often analysed either the EU s institutional structure and its potential for leadership or mainly focused on only the most recent incumbents in case study analyses Focusing on the multiterm European Commission presidents Walter Hallstein Jacques Delors and Jos Manuel Barroso this book conceptualizes their political leadership as a performance and thus systematically analyzes their agenda setting mediative institutional and public outreach performance over the entire course of their presidential terms *Common Market and economic development: the*
