Economic Liberalization and Labor Markets Parviz Dabir-Alai,Mehmet Odekon,1998-04-23 Contains 11 essays which discuss the impact of economic liberalization on employment and unemployment Economic Liberalization and Labor Markets Parviz Dabir-Alai,Mehmet Odekon,1998-04-23 Contains 11 essays which discuss the impact of economic liberalization on employment and unemployment **Reforming the Labor Market in a Liberalized Economy** Gustavo Márquez,1995 In addition countries must produce a transparent atmosphere that depoliticizes contract disputes and negotiations Finally they must reform and strengthen institutions responsible for labor policies Labor Market Issues in the Caribbean Ms.Magda E. Kandil,Mrs.Genevieve Lindow,Mr.Mario Mansilla,Mr.Joel Chiedu Okwuokei,Jochen M. Schmittmann,Qiaoe Chen,Xin Li,Marika Santoro,Solomon Stavis,2014-07-01 The paper examines the determinants of employment growth drawing on data available across a sample of Caribbean countries To that end the paper analyzes estimates of the employment output elasticity and the response of employment growth to major sources of labor market determinants in the long and short run The main determinants of employment include government investment and private sector credit while the major determinants of external performance are real effective exchange rate the price of major exporting commodities the number of tourists and growth in major trading partners The paper concludes with a menu of policy recommendations and structural reforms towards sustaining high employment growth and higher living standards in the Caribbean Labor Markets in Hard-Peg Accession Countries: The Baltics and Bulgaria International Monetary Fund,2001-07-12 In recent years the IMF has released a growing number of reports and other documents covering economic and financial developments and trends in member countries Each report prepared by a staff team after discussions with government officials is published at the option of the member country *Monthly Labor Review* ,2001 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews Labor Markets in Asia Jesus Felipe,Rana Hasan,2006-07-03 This volume argues that while labour market reforms may be necessary in some specific cases by no means are labour market policies the main explanation for the widespread increase in unemployment and underemployment across Asia and country specific studies undermine the case for across the board labour market reforms *Labor Market Developments During Economic Transition* Jan J. Rutkowski,2006 The paper reviews labor market developments in the transition economies of Europe and Central Asia It argues that the scarcity of productive job opportunities and the growing labor market segmentation are the two main labor market problems facing the transition economies In the European transition economies the lack of jobs has led to persistent open unemployment In the Commonwealth of Independent States CIS it has led to hidden unemployment underemployment and low productivity employment Unemployment in the European transition economies is supported by the developed social safety net In contrast in the CIS for most workers unemployment is not an affordable option They either stick to their old unproductive jobs in

unrestructured enterprises or work in the informal sector or resort to subsistence agriculture. Thus underemployment in the CIS is a mirror image of unemployment in the European transition economies. Accordingly the high employment to population ratios in many CIS countries do not necessarily signify favorable labor market performance. Instead they often indicate delayed enterprise restructuring, the maintenance of unsustainable jobs in uncompetitive firms and the existence of a large informal sector as an employer of last resort. Labor market segmentation has been caused by a sharp increase in earnings differentials and the attendant increase in the incidence of low paid jobs by the polarization of regional labor market conditions and finally by the growth of the informal sector offering casual low productivity jobs. Labor market segmentation and accompanying inequalities are more pronounced in the CIS than in the European transition economies.

World Bank web site Labor Markets in Latin America Sebastian Edwards, Nora Claudia Lustig, 2001-06-29. Many of the rules that govern labor markets in Latin America and elsewhere raise labor costs, create barriers to entry and introduce rigidities in the employment structure. These include the exceedingly restrictive regulations on hiring and firing practices as well as burdensome social insurance schemes. Such labor market regulations contribute to an over expansion of precarious forms of employment and to rural poverty and hinder countries from responding rapidly to new challenges from increased foreign competition. At the same time other norms can reduce costs and raise productivity; they should be kept in place and their enforcement improved. For example some occupational health and safety standards lower medical costs and save lives. One may also want to keep legislation aimed at providing a minimum social insurance for unemployment, old age, sickness and disabilities. In practice the most common decision that governments confront is not whether to intervene but to choose among different forms of intervention. This volume provides analysts and policymakers with useful insights on this issue.

Part I addresses labor market institutions in a broader context such as collective bargaining arrangements, minimum wages and poverty and optimal unemployment insurance schemes. Part II analyzes labor market performance in Latin America, the links between performance and labor market regulations and the status of labor market reform in the region. These questions are addressed for the region as a whole and in great detail for Argentina, Brazil, Chile, Mexico and Colombia. The book provides a comprehensive description of the existing labor institutions in Latin America, the problems they pose and the trends in labor market reforms as well as the difficulties encountered by the reform process in specific cases. In addition to the editors, the contributors are Edward Amadeo, Jose Marcio Camargo, Alejandra Cox, Edwards, Rene Cortazar, Enrique **Labor Market Reform and Job Creation** J. Luis Guasch, 1999-01-01. Despite the resumption of economic growth in most Latin America and Caribbean LAC countries since the late 1980s, improvements on the employment/unemployment front have been sluggish at best, with a few notable exceptions. In many countries renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment and to restore wages to precrisis levels. After a number of years of relatively high economic growth, the employment outlook in many countries remains worrisome. In those countries

where unemployment rates appear to be low often as a result of how they are measured the concern is the low quality and remuneration levels of available jobs

Labor Versus Empire Gilbert G. Gonzalez, 2004 The essays in this collection address issues significant to labor within regional national and international contexts Themes of the chapters will focus on managed labor migration organizing in multi ethnic and multi national contexts global economics and labor global economics and inequality gender and labor racism and globalization regional trade agreements and labor

Governing Rapid Growth in China Ravi Kanbur, Xiaobo Zhang, 2009-04-15 After three decades of spectacular economic growth in China the problem is no longer how to achieve growth but how to manage its consequences and how to sustain it The most important consequence at least as far as Chinese policy makers are concerned is the rapidly growing inequality between persons between rural and urban areas and between inland and coastal regions At the same time the institutions that have brought rapid growth so far are now under stress and there is a need to reform and innovate on this front in order to sustain rapid growth and to have growth with equity The analytical literature has responded to the emerging policy problems by specifying and quantifying their magnitude understanding their nature and proposing policy approaches and solutions Policy makers have also been looking to analysts for interaction and assistance This volume brings together a collection of the best available analyses of China's problems in governing rapid growth focusing on equity and institutions Contributions include perspectives from leading policy makers who were intimately involved in the reform process and from leading academics in articles published in top peer reviewed journals

Barr, 2005-01-01 Labor Markets and Social Policy in Central and Eastern Europe summarises social policy reform during the transition and EU accession and analyses the social policy challenges which continue to face both old and new member states Specifically the book amplifies two sets of arguments First social policy under communism was in important respects well suited to the old order and precisely for that reason was systematically badly suited to a market economy Strategic reform directions thus followed from the nature of the transition process and from constraints imposed by EU accession Secondly successful accession is not the end of the story economic and social trends over the past 50 years are creating strains for social policy

which all countries old and new members will have to face This book will be of interest to readers interested in social policy particularly those with an interest in the process of post communist transition in EU accession and in future social policy challenges for the wider Europe It should be of interest to academics in departments of economics social policy and political science and to policy makers including government advisers and civil servants **Institutional Change after the Great Recession** Luis Cárdenas del Rey, Javier de Arribas Cámara, 2021-08-12 This book combines demand led growth models and the institutionalist approach in order to explain the macroeconomic performance of the main European countries in recent years followed by which a coherent explanation of the institutional change since the Great Recession including the economic policy response to the economic and financial crisis 2008 and to the debt crisis 2010 is provided A Comparative Political Economy CPE analytical framework and provide an institutional base to the different European growth models is built in general terms over the period 1995 2018 The results allow us to link diverse growth dynamics to the changes of the institutional framework as a consequence of the economic and financial crises In each chapter for country case studies France Germany Italy Spain Greece Sweden UK and Poland there s an ntroduction with a general characterization of the country and the most relevant changes that have occurred subsequently main legislative milestones or changes in the behaviour of social agents especially the process of dualization or deregulation of European economies In addition an analysis of the macroeconomic evolution and the situation of the labour market before and after the crisis from a demand side perspective is included concluding with the linkages between both issues and the characterization of the growth model This book is of special interest to all the students and university professors who will use this book to be able to follow a multitude of subjects from Applied Economy to International Economic Structure but can also be useful for researchers doctoral students and teaching staff who want to expand knowledge in the fields of comparative political economy institutions and the European Union In general this book is aimed at anyone interested in expanding their knowledge of the evolution of Europe today **Monetary Economics in Globalised Financial Markets** Ansgar Belke, Thorsten Polleit, 2011-06-14 This book integrates the fundamentals of monetary theory monetary policy theory and financial market theory providing an accessible introduction to the workings and interactions of globalised financial markets Includes examples and extensive data analyses **European Bloc Imperialism** Dennis C. Gendering Globalization on the Ground Gay Young, 2014-11-13 How has globalization worked for women working on the frontlines of neoliberalism on the Mexico US border This border divides US from Others and produces social inequalities that form a site where marginalized border women encounter the othering power of neoliberalism and confront inequalities of gender and class Within this context a critical comparison of socially similar women working either in export production industries or in small scale commerce and low level services in Ciudad Ju rez reveals how export factory work constrains women s empowerment at home as well as the wages they earn and the well being of their households This volume challenges the neoliberal rationale of empowering women to support market growth and argues instead for understanding women s empowerment as a process of transformation from disempowerment by gender power relations to challenging masculinist domination in households and ultimately the economy and society Because structures of gender and globalization are mutually constituted women s empowerment as gender democracy is integral to producing alternative democratic globalization Using a feminist methodology that gives attention to the standpoint of women located on the downside of social hierarchies and takes into account strategically diverse points of view this study develops analysis to counter neoliberal globalization as it touches down in the lives of ordinary women and men on the border and beyond

Designing Labor Market Institutions in Emerging and Developing Economies Mr.Romain A Duval, Mr.Prakash Loungani, 2019-05-21 This paper discusses theoretical aspects and evidences related to designing labor market institutions in emerging market and developing economies This note reviews the state of theory and evidence on the design of labor market institutions in a developing economy context and then reviews its consistency with actual labor market advice in a selected set of emerging and developing economies The focus is mainly on three broad sets of institutions that matter for both workers protection and labor market efficiency employment protection unemployment insurance and social assistance minimum wages and collective bargaining Text mining techniques are used to identify IMF recommendations in these areas in Article IV Reports for 30 emerging and frontier economies over 2005 2016 This note has provided a critical review of the literature on the design of labor market institutions in emerging and developing market economies and benchmarked the advice featured in IMF recommendations for 30 emerging market and frontier economies against the tentative conclusions from the literature

Globalization, Labour Markets and Inequality in India Dipak Mazumdar, Sandip Sarkar, 2020-11-25 India started on a program of reforms both in its external and internal aspects sometime in the mid eighties and going on into the nineties While the increased exposure to world markets globalization and relaxation of domestic controls has undoubtedly given a spurt to the GDP growth rate its impact on poverty inequality and employment have been controversial This book examines in detail these aspects of post reform India and discerns the changes and trends which these new developments have created Providing an original analysis of unit level data available

from the quinquennial National Sample Surveys the Annual Surveys of Industries and other basic data sources the authors analyse and compare the results with other pieces of work in the literature As well as describing the overall situation for India the book highlights regional differences and looks at the major industrial sectors such as agriculture manufacturing and tertiary services The important topic of labor market institutions both for the formal or organized and the unorganized sectors is considered and the possible adverse effect on employment growth of the regulatory labor framework is examined carefully Since any reform of this framework must go hand in hand with better state intervention in the informal sector to have any chance of acceptance politically some of the major initiatives in this area are critically explored Overall this book will be of great interest to development economists labour economists and specialists in South Asian Studies
