Economic Development Thought And Problems:

Economic Development Nicholas V. Gianaris, 1978

Thoughts on Economic Development in China

Ma Ying, Hans-Michael Trautwein, 2013-03-05 This book is about mutual influences of thinking about economic development in China and in the West from the 18th century until the present. Its chapters are contributed by development economists and historians of thought from China and other parts of the world. The book describes important stages in the evolution, cross fertilization and contextual modification of ideas about economic order, development and institutional change. It illustrates how Western concepts and theories have been adopted and adapted to Chinese conditions in different waves of modernization from the late 19th century until the present and that this was and is no one way traffic. The book examines to what extent pre-classical thinking in the West, in particular French Physiocracy in mid 18th century, was influenced by China as an ideal and a source of ideas at a time when China was the largest and most advanced economy in the world. It discusses to what extent different approaches of modern Western style economics, in particular in the fields of development economics and institutional economics, can be used to understand the rapid transitions and developments of the Chinese economy in recent decades and to what extent they need to be modified in the light of new experiences and insights. Against this background, several contributions to the volume provide assessments of the current state of economic science and teaching in China, in particular with regard to Chinese views on Western economics. The book should be of interest to those who are interested in the economic history of China.

The Science of Economic Development and Growth: The Theory of Factor Proportions

C.C. Onyemelukwe, 2016-07-08 A theoretical framework aiming to facilitate study of development economics. The author presents his theory in three sections: how advanced nations developed, a proposed third dimension in addition to labour and capital, and why capital accumulation is unnecessary even potentially harmful.

The New Horizon of China's Economic Law Theory Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market, between reform and rule of law, and between the constitution and economic law. On this basis, it subsequently focuses on development theory, distribution theory, risk theory, and crisis theory. Further, it addresses effective development, fair distribution, and prevention and resolution of related risks and crises, which are important functions of economic law. In order to achieve the above functions and objectives, the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China. The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed, i.e. regarding the implementation of the concept of coordinated development or the optimization of economic structures, the solution of distribution problems or the improvement of distribution systems, the prevention of risks or the response to crises, any such changes depend on economic rule of law. The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory, which will be of great value to

informs social work beyond the largely residual and individualistic conceptualisation of social work that currently prevails in many contexts Owing to the lack of social work theories models and generally literature that is locally and contextually relevant most social work lecturers based in African context struggle to access learning materials and texts that centre local indigenous voices and worldviews It is within this context that the ubuntu philosophy has gained traction There is increasing consensus that Ubuntu as an African philosophy and way of life has the potential to be used as a decolonising framework for social work education and practice Theorising from Ubuntu can influence and be the foundation for African social work theory and knowledge social work values and ethics social work research and policy and Ubuntu informing different fields of social work practice like social work with older people children and young people ubuntu and poverty alleviation ubuntu and the environment among others Drawing together social workers engaged in education research policy practice to theorise Ubuntu and its tenets philosophies and values this book shows how it can be a foundation for a decolonised more relevant social work education and practice in African contexts

The Theory of Economic Development Joseph Alois Schumpeter, 1983 Schumpeter proclaims in this classical analysis of capitalist society first published in 1911 that economics is a natural self regulating mechanism when undisturbed by social and other meddlers In his preface he argues that despite weaknesses theories are based on logic and provide structure for understanding fact Of those who argue against him Schumpeter asks a fundamental question Is it really artificial to keep separate the phenomena incidental to running a firm and the phenomena incidental to creating a new one In his answers Schumpeter offers guidance to Third World politicians no less than First World businessman In his substantial new introduction John E Elliott discusses the salient ideas of *The Theory of Economic Development* against the historical background of three great periods of economic thought in the last two decades

The authors all prominent in the field of development studies argue that the UN's founding document the UN Charter is infused with the human values and human concerns that are at the center of the UN's thinking on economic and human development today. In the intervening period the authors show how the UN's approach to development evolved from mainstream areas of economic development to include issues of employment poverty reduction fairer distribution of the benefits of growth equality of men and women child development social justice and environmental sustainability. The coverage spans the disciplines of sociology psychology economics political science political economy geography and management.
