Economic Inquiry And Its Logic Hc 2000:

Economic Inquiry and Its Logic James M. Buchanan, 2000 This volume presents a collection of Buchanan's most representative works in economic method and analysis As Robert D Tollison points out in his foreword Included in this volume are some of Buchanan's most often cited works on methodology including papers reflecting his emphasis on the subjective nature of opportunity costs and the implications of this subjectivity for economic analysis The works collected in this volume also demonstrate Buchanan's interest throughout his career in the ideas and issues posed by economic theory Buchanan shows throughout this volume that he believes economic theory can help explain the world around us Spanning nearly his entire fifty year career Buchanan's writings in this volume exhibit a consistency of thought and belief as ideas recur from paper to paper ever richer and more resonant The thirty six works represented here are grouped into the major categories 1 The Practice and Method of Economic Theory 2 Competition and Entrepreneurship 3 The Theory of Monopoly 4 Input Prices 5 Opportunity Cost and Efficient Prices 6 Increasing Returns and the Work Ethic 7 Economic Theory in a Post Socialist World Clearly these papers as a whole reflect a broad range of issues and provide us with countless insights More than this they give us a picture of the theorist in his workshop They acquaint us with what interests him and how he deals with important issues In his conclusion to the opening essay Is Economics the Science of Choice Buchanan typifies the richness of thought available throughout this volume Modern economics as practiced by professional scholars embodies confusions that are fundamentally methodological For myself I advance no claim that my own thinking has yet fully rid itself of the paradigms of neoclassical orthodoxy James M Buchanan is an eminent economist who won the Alfred Nobel Memorial Prize in Economic Sciences in 1986 and is considered one of the greatest scholars of liberty in the twentieth century The entire series will include Volume 1 The Logical Foundations of Constitutional Liberty Volume 2 Public Principles of Public Debt Volume 3 The Calculus of Consent Volume 4 Public Finance in Democratic Process Volume 5 The Demand and Supply of Public Goods Volume 6 Cost and Choice Volume 7 The Limits of Liberty Volume 8 Democracy in Deficit Volume 9 The Power to Tax Volume 10 The Reason of Rules Volume 11 Politics by Principle Not Interest Volume 12 Economic Inquiry and Its Logic Volume 13 Politics as Public Choice Volume 14 Debt and Taxes Volume 15 Externalities and Public Expenditure Theory Volume 16 Choice Contract and Constitutions Volume 17 Moral Science and Moral Order Volume 18 Federalism Liberty and the Law Volume 19 Ideas Persons and Events

Expertise Out of Context Robert R. Hoffman, 2007 Researchers have revealed that real expertise while applied to well defined tasks with highly circumscribed contexts often stretches beyond its routine boundaries For example a medical doctor may be called upon to diagnose a rare disease or perform emergency surgery outside his or her area of specialization because other experts are not available

Moreover in some cases the context for expertise is in a constant state of flux such that no one case is identical Expertise Out of Context is a culmination of some of the most insightful studies conducted by researchers in the fields of cognitive systems engineering and naturalistic decision making in the effort to better understand expertise and its development Born out of the Sixth International Conference on Naturalistic Decision Making a conference that gathers researchers who study cognition perception and reasoning outside of the traditional laboratory this book is organized in five parts the first of which provides an overview of the topic and presents varied perspectives Consequent sections cover how to make sense of things tools for thinking out of context how to cope with uncertainty in a changing workplace and teams operating out of context As researchers in naturalistic decision making have investigated such areas as the knowledge and decision making skills of expert firefighters critical care nurses military commanders and aircraft pilots this volume is of importance to an expansive audience including individuals in business government industry and society at large

Guide to Reprints ,2008 **The Index** ,1884 *Human Rights* Albert A. Zinnos,2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on

existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic
