The Economic Way of Thinking Paul T. Heyne, Peter J. Boettke, David L. Prychitko, 2006 Primarily for a one semester survey course in general economics The Economic Way of Thinking develops the basic principles of micro and macroeconomic analysis and employs them as tools rather than ends unto themselves This text introduces students to a method of reasoning to think like an economist through example and application It even teaches by showing students how not to think by exposing them to the errors implicit in much popular reasoning about economic events Economics in Action Jane S. Lopus, Amy M. Willis, National Council on Economic Education, 2003 Economics in Action combines 14 favorite NCEE simulations roleplaying activities group activities and classroom demonstrations in one volume *Advanced Placement Economics* John S. Heyne, 1973 The author of this book wants beginning students to master a set of concepts that will help them think more coherently and consistently about the wide range of social problems that economic theory illuminates The principles of economics must be taught as tools of analysis The teaching of a concept must take place in the context of application Better the potential application should be taught first then the tool Preface **Using Internet Primary Sources to Teach Critical Thinking Skills in Government, Economics, and Contemporary World Issues** James M. Shiveley, Phillip J. VanFossen, 2001-09-30 Teachers of political science social studies and economics as well as school library media specialists will find this resource invaluable for incorporating the Internet into their classroom lessons Over 150 primary source Web sites are referenced and paired with questions and activities designed to encourage critical thinking skills Completing the activities for the lessons in this book will allow students to evaluate the source of information the content presented and its usefulness in the context of their assignments Along with each Web site a summary of the site's contents identifies important primary source documents such as constitutions treaties speeches court cases statistics and other official documents The

questions and activities invite the students to log on to the Web site read the information presented interact with the data and analyze it critically to answer such questions as Who created this document Is the source reliable How is the information useful and how does it relate to present day circumstances If I were in this situation would I have responded the same way as the person in charge Strengthening these critical thinking skills will help prepare students for both college and career in the 21st century Economics, Second Edition Timothy Tregarthen, Timothy D.
