Economics Of Nonprofit Enterprise A Study In Applied Economic Theory:

The Economics of Nonprofit Enterprise Robert Scott Gassler, 1986-01-13 Gassler has a particularly keen sense of the threads of the arguments about the motivational forces that underpin non profit organizations Thus he has taken into account much of the alternative views and given them perspective Gassler also deals in an exciting way with the roles that non profit enterprises play in society and the types of non profit enterprises I heartily recommend this book

The Regulation of Organised Civil Society Jonathan Garton,2009-06-25 Although much has been written on organised civil society the loose collective of organisations that operate outside the public sector the private market and the family unit over the past 30 years there has been little jurisprudential analysis This is in spite of the fact that a number of jurisdictions including England New Zealand Northern Ireland and Scotland have recently implemented major reforms to the regulatory frameworks in which civil society organisations operate with a particular emphasis on the charitable sectors Redressing the balance this monograph considers from first principles when it is appropriate to regulate organised civil society and how that regulation might best be accomplished Four broad issues are addressed a whether the activities undertaken by civil society organisations are distinct from the activities undertaken by the state or the market either because they are pursued in unique ways or because they produce unique outcomes b if so whether it is justifiable to regulate organised civil society activities in a sector specific way c if it is whether the peculiar characteristics of these activities make one type of regulation more appropriate than another and d whether it is appropriate to distinguish between charities and other civil society organisations for regulatory purposes The monograph integrates the traditionally separate disciplines of civil society theory and regulation theory to provide answers to these questions and advance a rudimentary theory of regulation specific to organised civil society

The Associative Economy Franco Archibugi,2000-03-08 Are Welfare States in crisis Forty years after Gunnar Myrdal s seminal Beyond the Welfare State it is still little grasped in the reform debate that the whole structure and economies of our societies are being transformed This book reasserts the importance of a new employment and productive model that of the associative economy which integrates social solidarity with economic planning

The Study of Nonprofit Enterprise Helmut K. Anheier,Avner Ben-Ner,2012-12-06 This volume addresses the need to revisit the economic theories from the last two

decades that have contributed to the development of a concentrated research agenda on nonprofit organizations Long neglected as a topic of theorizing and empirical investigation by mainstream economics in particular these initial theories of nonprofit organizations from the late 1970s and early 1980s continue to shape theoretical and conceptual efforts Importantly their influence extends beyond economics and informs sociological and politics science approaches to the set of organizations and institutions located between the market firm and the state agency as well While the theoretical map of nonprofit research has expanded beyond these early attempts and now include several other major theories such as stakeholder approaches supply side or entrepreneurial theories institutional theories and comparative approaches This work suggests that it is time to take stock and reexamine some of the basics from which these economic theories operate

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide ranging spectrum of socio economic and political demands under the country's flourishing market economy and its wholesale pursuit of decentralization This book explores the issue of property ownership an area which is regarded as an essential element in the attraction into the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country's existing institutions The focus throughout this book is primarily on the legal economic managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities A feasibility analysis and discussion is also provided on for profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for profit in disguise It is argued in this book that such

quasi profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action Finally it is clear that in the transition from the rule of the people to the rule of law legislation practices and compliance do not always go hand in hand in China thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice This book concludes *Economics of Employment and Earnings* Christopher J. Bruce,1995 **Beyond Profit and Self-interest** Robert Scott Gassler,2003 Gassler economics Vrije U Brussels tries to establish some order in the chaos he sees resulting from economists expanding their portfolio to deal with just about everything in society He does not offer a new theory but reformulates existing theory to make it more applicable across disciplines illuminate its limitations and point out necessary extensions show its successes and provide some new extensions of his own First he sets out the scope method foundations and taxonomy of the theory then he surveys applications in such contexts as interactions non profits and planets He writes for upper division graduate and professional economists who are conversant in intermediate microeconomic theory multivariable calculus and statistics Annotation 2004 Book News Inc Portland OR booknews com **Economics of Higher Education** Robert K. Toutkoushian,Michael B. Paulsen,2016-03-18 This book examines the many ways in which economic concepts theories and models can be used to examine issues in higher education The topics explored in the book include how students make college going decisions the payoffs to students and society from going to college markets for higher education services demand and supply in markets for higher education why and how state and federal governments intervene in higher education markets college and university revenues and expenditures how institutions use net pricing strategies and non price product differentiation strategies to pursue their goals and to compete in higher education markets as well as issues related to faculty labor markets The book is written for both economists and non economists who study higher education issues and provides readers with background information and thorough explanations and illustrations of key economic concepts In addition to reviewing the contributions economists have made to the study of higher education it also examines recent research in each of the major topical areas The book is policy focused and each chapter analyses how contemporary higher education policies affect the behaviour of students faculty and or institutions of higher education Toutkoushian and Paulsen attempted a daunting task to write a book on the economics of higher education for non economists that is also useful to economists A book that could be used for reference and as a textbook for higher education classes in economics finance and policy They accomplish this tough balancing act with stunning success in a large volume that will serve as the go to place for anyone interested in the history and current thinking on the economics of higher education William E Becker Jr Professor Emeritus

of Economics Indiana University **Modernising Charity Law** Myles McGregor-Lowndes, Kerry O'Halloran, 2010-01-01 In recent years the pressure for charity law reform has swept across the common law jurisdictions with differing results Modernising Charity Law examines how the UK jurisdictions have enacted significant statutory reforms after many years of debate whilst the federations of Canada and Australia seem merely to have intentions of reform New Zealand and Singapore have begun their own reform journeys This highly insightful book brings together perspectives from academics regulators and practitioners from across the common law jurisdictions The expert contributors consider the array of reforms to charity law and assess their relative successes Particular attention is given to the controversial issues of expanded heads of charity public benefit religion competition with business government participation and regulation The book concludes by challenging the very notion of charity as a foundation for societies which faced by an array of global threats and the rising tide of human rights must now also embrace the expanding notions of social capital social entrepreneurship and civil society This original and highly topical work will be a valuable resource for academics regulators and legal practitioners as well as advanced and postgraduate students in law and public policy Specialists in charity law comparative law and law and public policy should also not be without this important book **Proceedings of the ... Annual George Bugbee Symposium on Hospital Affairs**, 1989 **Southern Economic Journal**, 1986 Contains section Book reviews *Handbook of Research on Nonprofit Economics and Management* Bruce Alan Seaman, Dennis R. Young, 2010 Nonprofit organizations are arguably the fastest growing and most dynamic part of modern market economies in democratic countries This book explores the frontiers of knowledge at the intersection of economics and the management of these entities The authors review the role structure and behavior of private nonprofit organizations as economic units and their participation in markets and systems of public service delivery assess the implications of this knowledge for the efficient management of nonprofit organizations and the formulation of effective public policy and identify cutting edge questions for future research Chapters address five broad categories of scholarship development and management of the diverse economic resources supporting nonprofit organizations market behavior of nonprofits strategic economic decision making evaluation and performance of them and impacts and implications of public policies affecting nonprofit organizations Topics include income diversification and crowd out among income sources paid and volunteer labor markets competition and collaboration among nonprofits and for profits pricing and diversification of nonprofit products and services performance measurement and regulation contracting franchising and federation practices and government taxation and funding The book will help nonprofit scholars identify new areas of productive research help practicing managers understand the underlying economics of their decision making and offer teachers and students a concise and penetrating view of key economic dimensions to managing nonprofit organizations
