The Political Economy of Transitions to Peace Galia Press-Barnathan,2009-07-05

Much attention has focused on the ongoing role of economics in the prevention of armed conflict and the deterioration of relations In The Political Economy of Transitions to Peace Galia Press Barnathan focuses on the importance of economics in initiating and sustaining peaceful relations after conflict Press Barnathan provides in depth case studies of several key relationships in the post World War II era Israel and Egypt Israel and Jordan Japan the Philippines and Indonesia Japan and South Korea Germany and France and Germany and Poland She creates an analytical framework through which to view each of these cases based on three factors the domestic balance between winners and losers from transition to peace the economic disparity between former enemies and the impact of third parties on stimulating new cooperative economic initiatives Her approach provides both a regional and cross regional comparative analysis of the degree of success in maintaining and advancing peace of the challenges faced by many nations in negotiating peace after conflict and of the unique role of economic factors in this highly political process Press Barnathan employs both liberal and realist theory to examine the motivations of these states and the societies they represent She also weighs their power relations to see how these factor into economic interdependence and the peace process She reveals the predominant role of the state and big business in the initial transition phase cold peace but also identifies an equally vital need for a subsequent broader societal coalition in the second normalizing phase warm peace Both levels of engagement Press Barnathan argues are essential to a durable peace Finally she points to the complex role that third parties can play in these transitions and the limited long term impact of direct economic side payments to the parties

Peacemaking from Above, Peace from Below Norrin M.

Ripsman,2016-05-31 In Peacemaking from Above Peace from Below Norrin M Ripsman explains how regional rivals make peace and how outside actors can encourage regional peacemaking Through a qualitative empirical analysis of all the regional rivalries that terminated in peace treaties in the twentieth century including detailed case studies of the Franco German Egyptian Israeli and Israeli Jordanian peace settlements Ripsman concludes that efforts to encourage peacemaking that focus on changing the attitudes of the rival societies or democratizing the rival polities to enable societal input into security policy are unlikely to achieve peace Prior to a peace treaty he finds peacemaking is driven by states often against intense societal opposition for geostrategic reasons or to preserve domestic power After a formal treaty has been concluded the stability of peace depends on societal buy in through mechanisms such as bilateral economic interdependence

democratization of former rivals cooperative regional institutions and transfers of population or territory Society is largely irrelevant to the first stage but is critical to the second He draws from this analysis a lesson for contemporary policy Western governments and international organizations have invested heavily in efforts to promote Israeli Palestinian and Indo Pakistani peace by promoting democratic values economic exchanges and cultural contacts between the opponents Such attempts to foster peace are likely to waste resources until such time as formal peace treaties are concluded between longtime adversaries

The A to Z of the Arab-Israeli Conflict P R Kumaraswamy, 2009-07-24 For over a century the conflict between the Arabs and Jews has remained the most intractable problem confronting the world Hardly a day passes that the Arab Israeli Conflict is not headlined in the media It has turned the Arabs and Israelis against one another and embittered relations within the two communities while drawing the rest of the world into the circle of disruption The A to Z of the Arab Israeli Conflict provides factual background through an introductory essay a chronology a bibliography and hundreds of cross referenced dictionary entries on the more significant persons places and events including the various wars and negotiations The history religion culture and archeology that this rivalry has sparked between the Arabs and Israelis over the same piece of territory is traced in this book which offers the essential details using neutral terms and thereby allowing readers to draw conclusions for themselves

The Israeli Conflict System Harvey Starr, Stanley Dubinsky, 2015-07-30 The Middle East conflict system is perhaps the world s most important and intractable problem area whose developments carry global consequences An effective investigation of the context and change in the region calls for a melding of academic approaches methods and findings with policy oriented needs The Israeli Conflict System brings together leading conflict scholars primarily from political science applying a range of advanced rigorous analytic and data gathering techniques to address this single empirical domain the contemporary Israeli Conflict System Recognising the causal complexity of this conflict system the volume s central theme is that the system s current conditions are best understood in their broader temporal historic cultural linguistic and spatial geographic contexts Through the lens of economic geographic historical linguistic and political analyses and the application of data analysis experiments simulations and models of rational choice this volume shows how diverse disciplinary perspectives and methodologies can complement each other effectively In this way its chapters provide a model for the integration of factors and contexts necessary for understanding contemporary world politics and a sampling of theories approaches and methods that are applicable useful or valid under different conditions This book offers a cutting edge resource for scholars and students of Political Science International Relations Conflict Studies and Middle East Studies
