Theories of Surplus and Transfer (Routledge Revivals) Helen Heslop,2014-10-10 First published in 1990 this is an analysis of the history of western economics from Petty to Supply Side through the prism of the controversies over productive labour and its product It treats the early economists productive unproductive dichotomies as shorthands for many other sets of distinctions relevant for boundaries value and welfare Central to the debates is the question of whether the economy is said to generate a surplus Economists and politicians with views on these matters include the Physiocrats Smith and Ricardo Marx and his Soviet and western admirers the marginalists Keynes Polanyi Becker and Reagan The book maps the shifting emphases that economists and social thinkers have placed on markets and mode of production generally This reissue will be useful to students of economic thought welfare theory and policy growth economics and economic systems Innovation, Organization and Economic Dynamics Giovanni Dosi,2000-01-01 Conventional economic analysis of property rights in natural resources is too narrow and restrictive to allow for effective comparisons between alternative institutional structures In this book a conceptual framework is developed for the analysis of the Economics Education David Whitehead,1986 Case Studies on Modern European Economy Tibor Iván Berend,2013 The last two centuries have been the scene of dramatic change throughout Europe And one of the main causes of these tremendous and spectacular changes was the economy These transformations were achieved by people scientists and political thinkers inventors and entrepreneurs educators skilled and educated workers Who not only invented machines and computers but were able to renew economic and political systems

This volume therefore presents a new approach to the period by looking at case studies to understand how these changes came about and the impact they had on modern Europe Ivan Berend presents the spectacular history of modern European economy as a chain of small events actions and the ideas of individuals as the influence of institutions and bold entrepreneurs The essays are grouped into six chapters and discuss the power of entrepreneurship the power of institutions economic regimes and the permanent renewal of capitalism the power of ideas and inventions pioneering companies from the rise of industrial cities to post industrial suburbanization bubbles great depressions and economic cycles All of the single episodes and personal stories offer a cross section of the complex and interrelated history of modern Europe Case Studies on Modern European Economy will be essential reading for students of economic and modern European history

Human Nature in Modern Economics Anna Horodecka,2022-06-15 Human Nature in Modern Economics offers a precise definition of the concept of human nature in economics something that is so far lacking in the theoretical and methodological literature This book develops tools for the analysis of human nature through the construction of the author s meta model based on anthropological and psychological foundations allowing for comparisons of anthropological assumptions made in economic theories The model demonstrates that the normative functions of human nature may affect the economic reality The chapters argue that the concept of human nature determines our thinking about the economy and economics including fundamental methodologies methods and theories Thus the differences between various economic schools may result from the different assumptions of these schools about human nature Those evolving views of human nature proceed to explain the development of both orthodox mainstream and heterodox economics The book marks a significant addition to the literature on the history of economic thought heterodox economics economic theory and economic methodology For students it is a supplement to standard textbooks as it explains the current state of economics especially in its heterodox branches It will allow scholars to discover the importance of what they assume about human nature and how it may influence their research process
