Economics Facts Theory And Policy:

Economics Chris C. Rhoden,1976 **Economics of Physiocracy** Ronald L. Meek,2013-11-05 The birth of Physiocracy was the birth of the science of economics in the broad general form in which it is known to us today It is surprising therefore that the Physiocrats should have received so little attention from economists in the English speaking world This book fills that gap The volume begins with a deliberately non specialist introduction Translations of Physiocratic writings then follow and the final section of the book consists of specialized essays dealing with certain aspects of the Physiocratic doctrine its history and its influence *Concepts Of Transportation Economics* Barry E Prentice,Darren Prokop,2015-11-16 Transportation is the world s largest invisible industry Modern society is completely dependent on transportation to sustain its way of life and it is all around us constantly Yet the economics of transportation is a mystery to most people Why do air fares rise and fall Why do urban transit systems struggle to survive and require such large public subsidies Why does freight transport cost more to move in one direction than an equal distance in another Why is the government so heavily involved in transportation *Concepts of Transportation Economics* provides explanations to these queries and many more as well renowned experts in the field Barry E Prentice and Darren Prokop interpret the unique dynamics underlying transportation through the lens of applied economics and demonstrate that the operations of transportation are completely logical and obvious once the concepts that underlie business decisions and consumer reactions are explained *Facts, Values and Objectivity in Economics* José Castro Caldas,Vítor Neves,2012-03-22 Is Economics an objective or positive science independent of ethical and political positions The financial crisis that began in 2007 gave rise to renewed doubts regarding the objectivity of economics and brought into the public arena a debate that was previously confined to academia A remarkable feature of the public debate on the value neutrality of economics since then was that it not only involved indictments of ideological biases in economic theory but also the attribution of the crisis itself to the unethical orientation of economic agents of economists acting as experts and of economic science itself The contributors to this volume believe that economists of all persuasions are once again compelled to probe the normative foundations of their discipline and give a public account of their doubts and conclusions **Advances in Efficiency and Productivity Analysis** Christopher F. Parmeter,Robin C. Sickles,2020-10-21 The volume examines the state of the art of productivity and efficiency analysis It brings together a selection of the best papers from the 10th North American Productivity Workshop By analyzing world wide perspectives on challenges that local economies and institutions may face when changes in productivity are observed readers can quickly assess the impact of productivity measurement productivity growth dynamics of productivity change measures of labor productivity measures of technical efficiency in different sectors frontier analysis measures of performance industry instability and spillover effects The contributions in this volume focus on the theory and application of economics econometrics statistics management science and operational research related to problems in the areas of productivity and

Development in the Twenty-first Century Matthew Kofi Ocran, 2019-04-27 This book uses lessons from history to help African countries take charge of their own economic development agenda History is an important part of Africa's economic development narrative and Ocran investigates how the development outcomes between Africa and Western Europe became so divergent when in the early medieval period average income levels and economic development in the two regions differed only marginally The sixteenth century marked a turning point with the emergence of Western European mercantilism and capitalism and their associated exploitation of other countries In understanding Africa's economic development it is crucial to recognise that Africa has not always been poor Examining 400 years of enslavement and colonisation this book takes us to present day Africa and economic issues affecting the continent With selected case studies from Hong Kong Taiwan and Singapore to South Korea and China Ocran proposes ways to break out of the economic development quandary Africa currently faces Economics Campbell R. McConnell, 1978 **Social Limits to Economic Theory** Jonathan D

Mulberg, 2005-09-26 Modern economics makes much of its claim to be impartial objective and value free but it is unable to address our most immediate problems such as widespread environmental degradation and persistent poverty In Social Limits to Economic Theory Jon Mulberg argues for a new progressive political economy based on notions of community and justice and incorporating environmental and ethical considerations In doing so he provides the best introduction to date to critical non orthodox economics Empirical Law and Economics Atsushi Maki, 2024-07-05 Maki provides an empirical analysis of law and economics by reevaluating Myrdal's value premises and Weber's separation of analysis and policy In modern civil society individuals and businesses conduct economic activities through markets The mainstream economic theory is the general equilibrium theory which assumes a perfectly competitive market The upshot is that transactions through competitive markets maximize the economic welfare of society with policies such as deregulation and privatization being implemented with the backing of the law However in the real economy legal transactions do not always take place and this book analyzes price fixing and bid rigging cases These cases show that there is a gap between competition philosophy and legislation Using the real economy as data this book conducts an empirical analysis of law and economics and illustrates issues related to the ideals of economics and the proper application of law Accumulating empirical results will provide the

means to form a healthy civil society A useful reference for graduate students and researchers in economics and legal research and an interesting read for those who consider economics to be an empirical science Economic Crisis and Third World Agriculture Ajit Singh, Hamid Tabatabai, 1993-10-21 Examines the effects of world economic crisis on agrarian development at a regional and global level **An Institutional Assessment of Antitrust Policy** Ignacio De León, 2009-01-01 Antitrust policy nominally plays an instrumental public interest role The generally accepted notion is that it is a government instrument designed to intervene in relatively unregulated markets in order to preserve rivalry among independent buyers and sellers Competition authorities are supposed to restrain business conduct that exercises monopoly power aimed at excluding competitors or exploiting consumers and clients Thus it can be said although few pro market theorists make the insight explicit that antitrust provisions reveal mistrust of the capacity of markets to promote social welfare The inner logic enforcement mechanisms and practical outcomes of antitrust provisions are all intrinsically contradictory to the natural dynamic course of market functioning In Dr De Leon s challenging thesis this mistrust of the market lies at the root of antitrust policy giving rise always to a preference towards predicting the result of impersonal market forces rather than interpreting the entrepreneurial behaviour which creates those forces And it is in Latin America that he finds the powerful evidence he needs to support his case From the formative years of Latin American economic institutions during the Spanish Empire economic regulations far from being driven by the pursuit of promoting free trade and economic freedom have been conceived enacted and implemented in the context of deeply anti market public policies trade mercantilism and government dirigisme The so called neoliberal revolution of the 1990s triggered by the Washington Consensus did not really change the interventionist innuendo of these policies but merely restated the social welfare goal to be achieved the pursuit of economic efficiency Dr De Leon presents his case against the assumption that consumer welfare orientated policies such as antitrust do really promote entrepreneurship and market goals Paradoxically antitrust enforcement has undermined the transparency of market institutions in the name of promoting market competition The author s provocative analysis marshals several sets of facts in support of his thesis including the actual functioning of antitrust policy as reflected in case law in various Latin American countries the preference of merger control over other less intrusive forms of market surveillance the constrained role of competition advocacy against government acts and the ineffective institutional structure created to apply the policy Among the many specific topics treated are the following government immunity strategic industries state owned enterprises politically influential groups measurement of market concentration the burden of proof of social welfare benefits the role of joint trade associations and professional guilds institutional arrangements that favour collusion selective distribution sector regulation erosion of property rights marginal role of courts in the antitrust system leniency programs and privatized public utilities The growing significance of Latin America in the context of economic globalization endows this book with huge international interest Written by a leading

authority on the topic this is the first book that presents a detailed description of Latin American antitrust law and policy as it has been developed through numerous judicial opinions A wide variety of audiences around the world will find it of extraordinary value competition law specialists scholars and students of the subject policymakers and politicians in Latin America as well as all interested lawyers jurists and economists [EBOOK The Economics of European Integration](#) 6e Richard Baldwin, Charles Wyplosz, 2019-04-05 **introductory**
