ECOOP 2002 Workshop Reader Juan Hernández, Ana Moreira, 2014-03-12 ECOOP 2002 Workshop Reader **ECOOP 2005 - Object-Oriented Programming** Andrew Black, 2005-07-18 The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK This volume includes the refereed technical papers presented at the conference and two invited papers It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field Although such self evaluations should always be taken with a large grain of salt ECOOP is undisputedly the pre eminent conference on object orientation outside of the United States In its turn object orientation is today's principal technology not only for programming but also for design analysis and specification of software systems As a consequence ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research which is why ECOOP has remained such an interesting conference But ECOOP is more than an interesting conference It is the nucleus of a technical and academic community a community whose goals are the creation and dissemination of new knowledge Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines bring together researchers and practitioners cross cultures and reach from one side of the world to the other The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago But the role of conferences like ECOOP in establishing collaborations has not diminished

conference repeated the success of its predecessors This excellence is certainly due to the level of maturity that object oriented technology has reached which warrants its use as a key paradigm in any computerized system The principles of the object oriented paradigm and the features of systems languages tools and methodologies based on it are a source of research ideas and solutions to many in all areas of computer science ECOOP 2000 showed a thriving field characterized by success on the practical side and at the same time by continuous scientific growth Firmly established as a leading forum in the object oriented arena ECOOP 2000 received 109 high quality submissions After a thorough review process the program committee selected 20 papers which well reflect relevant trends in object oriented research object modeling type theory distribution and coordination advanced tools programming languages The program committee consisting of 31 distinguished researchers in object orientation met in Milan Italy to select the papers for inclusion in the technical program of the conference **ECOOP 2004**

- Object-Oriented Programming Martin Odersky, 2004-11-24 ECOOP is the premier forum in Europe for bringing together practitioners researchers and students to share their ideas and experiences in a broad range of disciplines woven with the common thread of object technology It is a collage of events including outstanding invited speakers carefully refereed technical papers practitioner reports reflecting real world experience panels topic focused workshops demonstrations and an interactive posters session The 18th ECOOP 2004 conference held during June 14-18 2004 in Oslo Norway represented another year of continued success in object oriented programming both as a topic of academic study and as a vehicle for industrial software development Object oriented technology has come of age it is now the commonly established method for most software projects However an expanding field of applications and new technological challenges provide a strong demand for research in foundations design and programming methods as well as implementation techniques There is also an increasing interest in the integration of object orientation with other software development techniques We anticipate therefore that object oriented programming will be a fruitful subject of research for many years to come This year the program committee received 132 submissions of which 25 were accepted for publication after a thorough reviewing process Every paper received at least 4 reviews Papers were evaluated based on relevance significance clarity originality and correctness The topics covered include programming concepts program analysis software engineering aspects and components middleware verification systems and implementation techniques These were complemented by two invited talks from Matthias Felleisen and Tom Henzinger Their titles and abstracts are also included in these proceedings **ECOOP 2001 -**

ECOOP '87. European Conference on Object-Oriented Programming Jean Bezivin,Jean-Marie Hullot,Pierre Cointe,Henry Lieberman,2007-03-06 In October 1983 an informal meeting was organized in Le Cap d Agde with

the help of the BIGRE bulletin Sixty people turned out to hear more than ten presentations on object oriented programming More important was their unanimous demand for other more structured encounters So about one year later the Object group was created by AFCET A second workshop was organized in Brest and again one year later in Paris each time showing increased attendance and interest The success of these meetings and the fact that similar activities were taking place in other European countries especially Great Britain and Germany led to the idea of an annual European Conference providing a forum for theorists and practitioners interested in the object oriented programming paradigm It is impossible to acknowledge here all the people and organizations that welcomed with great enthusiasm the birth of the ECOOP conference and contributed to its organization More than a hundred submissions were received and the program committee had the unpleasant task of turning down many valuable contributions We hope however that the selection of papers for ECOOP 87 emphasizes the fundamental issues and problems of object oriented programming and will point toward interesting future research directions

ECOOP 2008 - Object-Oriented Programming Jan Vitek, 2008-07-01 It is a pleasure to present the proceedings of the 22nd European Conference on Object Oriented Programming ECOOP 2008 held in Paphos Cyprus The conference continues to serve a broad object oriented community with a technical program spanning theory and practice and a healthy mix of industrial and academic participants This year a strong workshop and tutorial program complemented the main technical track We had 13 workshops and 8 tutorials as well as the co located Dynamic Language Symposium DLS Finally the program was rounded out with a keynote by Rachid Guerraoui and a banquet speech by James Noble As in previous years two Dahl Nygaard awards were selected by AITO and for the first time the ECOOP Program Committee gave a best paper award The proceedings include 27 papers selected from 138 submissions The papers were reviewed in a single blind process with three to five reviews per paper Preliminary versions of the reviews were made available to the authors a week before the PC meeting to allow for short 500 words or less author responses The responses were discussed at the PC meeting and were instrumental in reaching decisions The PC discussions followed Oscar Nierstrasz Champion pattern PC papers had five reviews and were held at a higher standard
