Ecotourism Development In The Pacific Islands Escap Tourism Review No 23:

Ecotourism Development in the Pacific Islands United Nations. Economic and Social Commission for Asia and the Pacific, 2003 Some Pacific island countries have considered that ecotourism could provide considerable opportunities for future development in ways that highlight their diverse cultural heritage abundant natural resources and unspoiled environment This Tourism Review No 23 presents a series of country papers reporting on the experiences and challenges for ecotourism in selected Pacific island countries as well as technical papers addressing general issues for ecotourism in island developing countries

Underwater Eden Gregory S. Stone, David Obura, 2012-12-21 It was the first time I d seen what the ocean may have looked like thousands of years ago That s conservation scientist Gregory S Stone talking about his initial dive among the corals and sea life surrounding the Phoenix Islands in the South Pacific Worldwide the oceans are suffering Corals are dying off at an alarming rate victims of ocean warming and acidification and their loss threatens more than 25 percent of all fish species who depend on the food and shelter found in coral habitats Yet in the waters off the Phoenix Islands the corals were healthy the fish populations pristine and abundant and Stone and his companion on the dive coral expert David Obura determined that they were going to try their best to keep it that way Underwater Eden tells the story of how they succeeded against great odds in making that dream come true with the establishment in 2008 of the Phoenix Islands Protected Area PIPA It s a story of cutting edge science fierce commitment and innovative partnerships rooted in a determination to find common ground among conservationists business interests and governments all backed up by hard headed economic analysis Creating the world s largest and deepest UNESCO World Heritage Site was by no means easy or straightforward Underwater Eden takes us from the initial dive through four major scientific expeditions and planning meetings over the course of a decade to high level negotiations with the government of Kiribati a small island nation dependent on the revenue from the surrounding fisheries How could the people of Kiribati and the fishing industry its waters supported be compensated for the substantial income they would be giving up in favor of posterity And how could this previously little known wilderness be transformed into one of the highest profile international conservation priorities Step by step conservation and its priorities won over the doubters and Underwater Eden is the stunningly illustrated record of what was saved Each chapter reveals with eye popping photographs a different aspect of the science and conservation of the underwater and terrestrial life found in and around the Phoenix Islands coral reefs Written by scientists politicians and journalists who have been involved in the conservation efforts since the beginning the chapters brim with excitement wonder and confidence tempered with realism and full of lessons that the success of PIPA offers for other ambitious conservation projects worldwide Simultaneously a valentine to the diversity resilience and importance of the oceans and a riveting account of how conservation really can succeed against the toughest obstacles Underwater Eden is sure to enchant any ocean lover whether ecotourist or armchair scuba diver
