Integrating Employee Health Institute of Medicine, Food and Nutrition Board, Committee to Assess Worksite Preventive Health Program Needs for NASA Employees, 2005-09-29 The American workforce is changing creating new challenges for employers to provide occupational health services to meet the needs of employees The National Aeronautics and Space Administration NASA workforce is highly skilled and competitive and employees frequently work under intense pressure to ensure mission success The Office of the Chief Health and Medical Officer at NASA requested that the Institute of Medicine review its occupational health programs assess employee awareness of and attitude toward those programs recommend options for future worksite preventive health programs and ways to evaluate their effectiveness The committee's findings show that although NASA has a history of being forward looking in designing and improving health and wellness programs there is a need to move from a traditional occupational health model to an integrated employee centered program that could serve as a national model for both public and private employers to emulate and improve the health and performance of their workforces

Computational Intelligence Techniques for 5G Enabled IoT Networks Mohit Kumar, Sukhpal Singh Gill, Vijay Kumar, Prabal Verma, 2025-07-26 This book explores emerging interdisciplinary themes and applications reflecting advancements in Computational Intelligence CI for IoT and 5G networks It is divided into four sections Section 1 introduces Computational Intelligence and Sustainability Solutions for Next Gen IoT Networks Section 2 covers Optimization and Resilience Strategies for 5G Enabled IoT Networks Section 3 delves Intelligent Resource Allocation and Service Optimization in 5G IoT Networks Section 4 presents Case studies on Applied Computational Intelligence and 5G IoT Innovations for Industry 4.0 This comprehensive work is essential for researchers and professionals interested in leveraging CI IoT and 5G technologies across diverse applications

Data in Context Bas van Gils, 2023-07-31 Data is an increasingly important asset for many organizations This book shows how to model data in a way that allows to exploit this asset effectively and in every respect To this end it combines and exploits scientific semiotics relational model etc and pragmatic theories most prominently the DAMA wheel and provides a coherent overview from a business and an IT/ICT perspective After a brief introduction the remaining book consists of three parts In Part I Data the focus is on understanding data It includes theories in semiotics the relational model and normalization as well as related theories around understanding data designing sound data structures This part is complemented by an extensive chapter on how to design effective data structures and a smaller one on the topic of create versus use context Part II Data Management then focuses on managing data as an asset This part is based on the DMBOK and each of the functional areas is discussed in

a separate chapter Part III Parting Thoughts presents conclusions which are based on a synthesis of Part I and Part II leading up to a summary of the main contributions of this book as well as a critical reflection on these results This book is written for a rather broad audience ranging from professionals to students both from business computer science and information management The writing style is adjusted specifically for these groups At the end of each chapter reflection questions are included that distinguish between questions for practitioners and for students and help both audiences to benefit from the book and check their comprehension
