Creating Thinking Classrooms Garfield Gini-Newman, Roland Case, 2018-03-22 Reinventing today's schools with Critical Creative and Collaborative thinking. Critical creative and collaborative thinking should be at the centre of all 21st-century teaching and learning. *Creating Thinking Classrooms* is loaded with examples, stories, and strategies for reinventing schools with this quality thinking. Written for leaders who support teachers, this guide treats educational change as a process of renovation rather than process of revolution and emphasizes building upon, refining, and sustaining the many good things happening in today's schools. Practical and user-friendly, it emphasizes five key principles for learning and teaching: Engaging students, Sustaining inquiry, Nurturing self-regulated learners, Creating assessment-rich learning, and Enhancing learning through digital technology. As a balanced and reasoned response to the challenges and opportunities facing schools, this book separates the rhetoric of school reform from reality by analyzing what's actually happening and offering a plan educators can use. Recapture the fundamentals of classroom learning with a practical and powerful roadmap charting the way forward. As a principal and community superintendent, I observed firsthand how transformational the work of Garfield Gini-Newman and Roland Case is in the school community and on a systemic level in the school community and on a systemic level. *Creating Thinking Classrooms* takes theory and research and places it directly into the hands of practitioners by offering thoughtful and immediately useful strategies.
