**Efficient Graph Representations:**

Efficient Graph Representations. Jeremy P. Spinrad,2003-01-01 Efficient Graph Representations Jeremy P. Spinrad,2003-01-01 The book deals with questions which arise from storing a graph in a computer Different classes of graphs admit different forms of computer representations and focusing on the representations gives a new perspective on a number of problems For a variety of classes of graphs the book considers such questions as existence of good representations algorithms for finding representations questions of characterizations in terms of representation and how the representation affects the complexity of optimization problems General models of efficient computer representations are also considered The book is designed to be used both as a text for a graduate course on topics related to graph representation and as a monograph for anyone interested in research in the field of graph representation The material is of interest both to those focusing purely on graph theory and to those working in the area of graph algorithms *Graph-Based Representations in Pattern Recognition* Luc Brun,2005-03-23 This book constitutes the refereed proceedings of the 5th IAPR International Workshop on Graph Based Representations in Pattern Recognition GbRPR 2005 held in Poitiers France in April 2005 The 18 revised full papers and 17 revised poster papers presented were carefully reviewed and selected from 50 submissions The papers are organized in topical sections on graph representations graphs and linear representations combinatorial maps matching hierarchical graph abstraction and matching inexact Graph-Based Representations in Pattern Recognition Xiaoyi Jiang,Miquel Ferrer,Andrea Torsello,2011-05-10 This book constitutes the refereed proceedings of the 8th IAPR TC 15 International Workshop on Graph Based Representations in Pattern Recognition GbRPR 2011 held in M nster Germany in May 2011 The 34 revised full papers presented were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on graph based representation and characterization graph matching classification and querying graph based learning graph based segmentation and applications Basic Graph Theory Md.
