pollution controls the energy crisis by finding new sources of energy and new ways of conserving it the economic crisis by manipulating prices taxes and interest rates But each effort to solve one crisis seems to clash with the solution of the others pollution control reduces energy supplies energy conservation jobs Inevitably proponents of one solution become opponents of the others Policy stagnates and remedial action is paralyzed adding to the confusion and gloom that beset the country So opens Barry Commoner's *The Poverty of Power* the book in which America's great biologist and environmentalist addresses himself to the central question of our day He concludes that what confronts us is not a series of separate crises but a single basic deficit a fault that lies deep in the design of modern society This book is an effort to unearth that fault to trace its relation to the separate crises and to consider what can be done to correct it at its root

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1977 **Changing Energy** John H. Perkins, 2017-09-05 Changing Energy outlines how humanity came to its current energy economy through three previous energy transitions and now stands poised for a necessary fourth one Despite the immense benefits conferred by a global energy economy based primarily on coal oil gas and uranium societies must now rebuild their energy economies to rely as much as possible on renewable energy used efficiently This imperative to change comes from the risks of climate change plus the dangers of geopolitical tensions health and

environmental effects and the long term prospects for ever depleting sources of today s energy sources Changing Energy argues that sustainability of the benefits from energy services will come from investments made in the technologies of the fourth transition Perkins envisions a viable post fossil fuel energy economy and outlines the barriers that must be resolved to reach it Provided by publisher **Non-neutral Plasma Physics** United States.
