Geshe Kelsang Gyatso,2002 In a commentary on the Buddhist poem Training the mind in seven points a Tibetan Buddhist teacher presents a series of methods for developing unconditional love and compassion *Masculinity, Meditation and Mental Health* T. Lomas,2014-03-19 It is said that men are in crisis blighted by the adverse effects of corrosive masculine norms ranging from emotional disconnection to aggression This book follows one group of men seeking to overcome their masculine inheritance and ultimately reach a sense of wellbeing by taking up meditation *What's the Point?* Anthony Peters,2008-08-07 This is a book about the meaning of life and achieving lasting happiness Incorporating religion spirituality and science this is an essential read for those who want to find that little bit extra into an ordinary life By reading this book you will find the signs which point towards permanent happiness and contentment in your life Discover new possibilities and become conscious of some very exciting and potentially life changing realisations Find out how you can be happier with yourself able to understand the behaviour and feel compassion for other people and have permanent contentment in your life Backing up religious theory with the astounding discoveries made within modern day science you will no longer question that your life holds far more than what meets the eye So if you are prepared to change your life for the better and feel better about yourself then read on and enter the door to your new and adventurous future Be warned however in order for you to discover pastures new you may need to overturn a few stones and cover some uncharted territory which may be challenging So with a touch of light heartedness enjoy your exciting journey to a more fulfilled and happy life **Music and Consciousness** David Clarke, Eric F. Clarke,2011-07-28 Consciousness has been described as one of the most mysterious things in the universe Scientists philosophers and commentators from a whole range of disciplines can't seem to agree what it is or why it is that the whole rich panoply of human experience seems to emerge from a lump of squishy grey matter in our heads Most agree though that consciousness represents a Hard Problem and consciousness studies has emerged as a quasi discipline over recent years as a multidisciplinary discourse seeking to address these and other fascinating and perplexing questions While the arts and humanities have joined the sciences at the debating table music has been relatively under represented until now This book redresses this balance Its 20 essays offer different takes on issues around music and consciousness both addressing existing agendas and introducing new ones No single view emerges but what the collection as a whole makes clear is that to understand consciousness we need to do much more than look at brains Studying music makes it clear that consciousness is as much to do with minds bodies culture and history The book which includes several chapters drawing from Eastern philosophies also provides a corrective to any perception that the study of consciousness is a purely Western preoccupation In addition to what it says about consciousness the book also and perhaps primarily represents a new configuration of writings about music *The New Guide to Dakini Land* Geshe Kelsang Gyatso,2012-01-01 Vajrayogini is a
