Historians professional military personnel and those interested in military history should read this book which contributes to the radical reappraisal of Great Britain's fighting forces in the last years of the Second World War with an exploration of the reasons why 21st Army Group was able in 1944-45 to integrate the operations of its armor and infantry. The key to understanding how the outcome developed lies in understanding the ways in which the two processes of fighting and the creation of doctrine interrelated. This requires both a conventional focus on command and a cross level study of Montgomery and a significant group of commanders. The issue of whether or not this integration of combat arms a guide to operational fighting capability had any basis in a common doctrine is an important one. Alongside this stands the new light this work throws on how such doctrine was created. A third interrelated contribution is in answering how Montgomery commanded and whether and to what extent doctrine was imposed or generated. Further it investigates how a group of effervescent commanders interrelated and what the impact of those interrelationships was in the formulation of a workable doctrine. The book makes an original contribution to the debate on Montgomery's command style in Northwest Europe and its consequences and integrates this with tracking down and disentangling the roots of his ideas and his role in the creation of doctrine for the British Army's final push against the Germans. In particular the author is able to do something that has defeated previous authors to explain how doctrine was evolved and especially who was responsible for providing the crucial first drafts and the role Montgomery played in revising codifying and disseminating it. *The Saturday Magazine ...*, 1842

The Saturday Magazine. Published Under the Direction of the Committee of General Literature and Education Appointed by the Society for Promoting Christian Knowledge, 1844 *Cumulated Index Medicus*, 1984 **Forgotten Captives in Japanese-Occupied Asia** Kevin Blackburn, Karl Hack, 2007-12-14 Using archival oral and literary sources Blackburn and Hack along with an impressive team of international contributors rectify the obscured picture of the Japanese captive by bringing together for the first time a collection of essays covering an extremely broad range of forgotten captives. **New York Magazine**, 1985-06-10 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea. The Normandy Campaign 1944 John Buckley, 2006-07-29 With essays from leading names in military history this new book re-examines the crucial issues and debates of the D Day campaign. It tackles a range of core topics placing them in their current historiographical context to present new and sometimes revisionist interpretations of key issues such as the image of the Allied armies compared with the Germans the role of air power and the lessons learned by the military from their operations. As the Second World War is increasingly becoming a field of revisionism this book sits squarely within growing debates shedding new light on topics and bringing current thinking from our leading military and strategic historians to a

wider audience This book will be of great interest to students of the Second World War and of military and strategic studies in general
