*The Future of Financial Regulation* Iain G MacNeil, Justin O'Brien, 2010-03-12 The Future of Financial Regulation is an edited collection of papers presented at a major conference at the University of Glasgow in spring 2009 co sponsored by the Economic and Social Research Council World Economy and Finance Programme and the the Australian Research Council Governance Research Network It draws together a variety of different perspectives on the international financial crisis which began in August 2007 and later turned into a more widespread economic crisis following the collapse of Lehman Brothers in the autumn of 2008 Spring 2009 was in many respects the nadir since valuations in financial markets had reached their low point and crisis management rather than regulatory reform was the main focus of attention The conference and book were deliberately framed as an attempt to refocus attention from the former to the latter The first part of the book focuses on the context of the crisis discussing the general characteristics of financial crises and the specific influences that were at work this time round The second part focuses more specifically on regulatory techniques and practices implicated in the crisis noting in particular an over reliance on the capacity of regulators and financial institutions to manage risk and on the capacity of markets to self correct The third

part focuses on the role of governance and ethics in the crisis and in particular the need for a common ethical framework to underpin governance practices and to provide greater clarity in the design of accountability mechanisms The final part focuses on the trajectory of regulatory reform noting the considerable potential for change as a result of the role of the state in the rescue and recuperation of the financial system and stressing the need for fundamental re appraisal of business and regulatory models

*The Future of the Social Investment State* Marius R. Busemeyer, Caroline de la Porte, Julian L. Garritzmann, Emmanuele Pavolini, 2020-04-02 Social investment is part of a strategy to modernize the European welfare states by focusing on human resource development throughout the life course while ensuring financial sustainability The last decades have seen cost containment in areas such as pensions and health care but also expansion in areas such as early childhood education higher education and active labor market policies This development is linked to a Social Investment SI approach which should ideally promote a better reconciliation of work and family life high levels of labor market productivity and strong economic growth while also mitigating social inequality However institutionalization of policies that may mainly benefit the middle class has some unintended effects such as perpetuating new inequalities and the creation of other Matthew effects While research on the rise of the social investment state as a new paradigm of social policy making for European welfare states has grown significantly there are still important gaps in the literature The chapters in this book address the controversies around social investment related to inequalities individual preferences and the politics of social investment This volume is therefore organized around policies politics and outcomes The contributing authors bring together expert knowledge and different perspectives on SI from several disciplines with original path breaking empirical contributions addressing some key questions that thus far are unanswered related to Matthew effects inequalities ambiguities of social investment and institutional complementarities Furthermore it is the first volume that covers the core policy areas of social investment childcare education and labour market policies The chapters in this book were originally published in a special issue of the Journal of European Public Policy

**Labour and the left in the 1980s** Jonathan Davis, Rohan McWilliam, 2017-12-11 This volume of essays constitutes the first history of Labour and left wing politics in the decade when Margaret Thatcher reshaped modern Britain Leading scholars explore aspects of left wing culture activities and ideas at a time when social democracy was in crisis There are articles about political leadership economic alternatives gay rights the miners strike the Militant Tendency and the politics of race The book also situates the crisis of the left in international terms as the socialist world began to collapse Tony Blair s New Labour disavowed the 1980s left associating it with failure but this volume argues for a more complex approach Many of the causes it championed are now mainstream suggesting that the time has come to reassess 1980s progressive politics despite its undeniable electoral failures With this in mind the contributors offer ground breaking research and penetrating arguments about the strange death of Labour Britain
