## **Future Of The Oceans A Report To The Club Of Rome:**

**The Future of the Oceans** Elisabeth Mann Borgese, Club of Rome, 1986 The oceans are our great laboratory for the making of a new international order based on new forms of international cooperation and organization on a new economic theory on a new philosophy or weltanschauung The book tries to explore this frontier *The Future of Ocean Governance and Capacity Development* International Ocean Institute - Canada, 2018-09-11 The International Ocean Institute Canada has produced this collection of over 80 insightful essays on the future of ocean governance and capacity development The book honors the work of Elisabeth Mann Borgese 1918 2002 preeminent ocean advocate and founder of the IOI More than 90 leading experts explore future challenges and opportunities for ocean governance and capacity development Major themes include the law of the sea ocean sciences integrated coastal and ocean management fisheries and aquaculture communication and negotiations maritime safety and security ocean energy and maritime transportation The essay collection is aimed at professionals students and citizens alike covering themes that parallel those in the annual Training Program of IOI Canada A leading member of the International Ocean Institute's network of centers and focal points worldwide IOI Canada was founded by Elisabeth Mann Borgese in 1979 *The Future of the Oceans* Elisabeth Mann Borgese, Club of Rome, 1986 The oceans are our great laboratory for the making of a new international order based on new forms of international cooperation and organization on a new economic theory on a new philosophy or weltanschauung The book tries to explore this frontier The Social Construction of the Ocean Philip E. Steinberg, 2001-10-25 This 2001 book presents a history of the uses regulations and representation of the world ocean from approximately 1450 through the present This history is told through a territorial political economy lens borrowing from world systems theory economic geographic studies of the spatiality of capitalism political geographic work on the history of territoriality and post structural work on social conflict in the production of space Just as the modern era has been characterized by a conflicting set of dynamic and contested spatiality on land so has it been characterized by a conflicting set of spatial functions at sea Evidence is marshaled from legal texts literary and artistic creations cartographic representations advertisements commercial and military history and policy debates The book concludes by considering how lessons learned from the history of the ocean may be applied to emerging spaces such as cyberspace where there is a similarly problematic fit between social processes and the institutions of state governance The Safe Operating Space Treaty Klaus Bosselmann, Paulo Magalhães, Will Steffen, 2016-04-26 It is clear that international law is not yet equipped to handle the ecological goods and services that exist simultaneously within and outside of all states The global commons have always been understood as geographical spaces that exist only outside the political borders of states A vital good such as a stable climate exists both within and outside all states and shows traditional legal approaches to be ecological nonsense With the recent possibility of measuring and monitoring the state and functioning of the Earth System through the Planetary Boundaries framework it is now possible to define a Safe Operating Space of

Humankind corresponding to a biogeophysical state of Earth In this sense the Common Home of Humanity is not a planet with 510 million square kilometres but is a specific favourable state of the Earth System Recent major scientific advances anticipate a legal paradigm shift that could overcome the disconnection between ecological realities and existing legal frameworks If we recognize this qualitative and non geographic space as a Common Natural Intangible Heritage of Humankind all positive and negative externalities end up being included within a new maintenance system of the Common Home

**International Law and the Genetic Resources of the Deep Sea** David Kenneth Leary, 2007 Deep sea genetic resources and the interest of the biotechnology industry in their exploitation are emerging as a significant challenge for international oceans governance This book is the first comprehensive examination of this issue and explores its relationship with marine scientific research and other activities in the deep sea As well as a detailed survey of the state of industry interest in this new field of biotechnology it also sets out proposals for future sustainable management of these resources utilizing many existing international law and policy regimes

**The Concept of the Common Heritage of Mankind in International Law** Kemal Baslar, 2024-02-06 The concept of the common heritage of mankind is one of the most extraordinary developments in recent intellectual history and one of the most revolutionary and radical legal concepts to have emerged in recent decades The year 1997 marks the thirtieth anniversary of the advent of the concept in the domain of public international law Ever since its emergence it has become evident that no other concept notion principle or doctrine has brought as much intensive debate controversy confrontation and speculation as the common heritage phenomenon did This is because it is a philosophical idea that questions the regimes of globally important resources regardless of their situation and requires major changes in the world to apply its provisions In other words the application

and enforcement of the common heritage of mankind require a critical reexamination of many well established principles and doctrines of classical international law such as acquisition of territory consent based sources of international law sovereignty equality resource allocation and international personality This book aims to explore the legal theory and implications of the concept of the common heritage of mankind It addresses almost all aspects of the concept in the light of the experience of three decades The author takes into account the elements of the common heritage concept in the fields of jurisprudence outer space law the law of the sea the law of Antarctica international environmental law human rights and general principles of public international law It tries to develop a normative framework through which the concept may offer alternatives for the governance of the global commons *Law of the Sea, Environmental Law and Settlement of Disputes* Tafsir Malick Ndiaye, Rüdiger Wolfrum, 2007-11-30 This volume covers a variety of topics in the fields of the law of the sea and the protection of the environment The particular focus of the volume is on the role and function of judicial quasi judicial and administrative institutions in the prevention and settlement of disputes in both of these areas This includes an overview and insightful analysis of the cases of the International Tribunal for the Law of the Sea during its first decade Further substantive issues range from the allocation of shared marine resources maritime boundary delimitation and issues of maritime security to the prevention of marine pollution as well as a coverage of the compliance and enforcement mechanisms of international environmental law The views from both scholars and practitioners perspectives presented in this volume will offer readers a number of outstanding intellectual synergies to reflect on the development of international law It can provide both scholars and policy makers alike with new insights on how to address pressing problems in international law including ideas for improved institutional design The work has been compiled in honour of Thomas A Mensah and comprises 59 essays from leading scholars and practitioners in international law *Research Handbook on Fundamental Concepts of Environmental Law* Douglas Fisher, 2016-11-25 The quality and the strength of an environmental legal system is a reflection of the conceptual foundations upon which it is constructed The Research Handbook on Fundamental Concepts of Environmental Law illuminates key aspects of environmental governance through the lens of their underlying dimensions for example the form structure and language of international regional and national instruments the function of norms objectives and standards and the relevance of economic analysis and of integrated policy formulation Elisabeth Mann Borgese and the Law of the Sea Tirza Meyer, 2022-03-21 In the late twentieth century as the United Nations struggled to come up with a new legal system for the oceans one woman saw the opportunity to promote radical new ideas of justice and internationalism Ocean governance expert Elisabeth Mann Borgese 1918 2002 spent decades working with the United Nations Law of the Sea Convention Throughout this sprawling series of global conferences she navigated allegiances and enmities intrigues and setbacks fighting determinedly to develop a just ocean order Featuring extensive research and new interviews with Mann Borgese s colleagues and family this book explores timeless questions of justice and international collaboration and asks

whether the extraordinary drive and vision of a single person can influence the course of international law      *Neptune's Laboratory* Antony Adler, 2019-11-19 An eyewitness to profound change affecting marine environments on the Newfoundland coast Antony Adler argues that the history of our relationship with the ocean lies as much in what we imagine as in what we discover We have long been fascinated with the oceans seeking to pierce the profundity of their depths In studying the history of marine science we also learn about ourselves Neptune's Laboratory explores the ways in which scientists politicians and the public have invoked ocean environments in imagining the fate of humanity and of the planet conjuring ideal world fantasies alongside fears of our species weakness and ultimate demise Oceans gained new prominence in the public imagination in the early nineteenth century as scientists plumbed the depths and marine fisheries were industrialized Concerns that fish stocks could be exhausted soon emerged In Europe these fears gave rise to internationalist aspirations as scientists sought to conduct research on an oceanwide scale and nations worked together to protect their fisheries The internationalist program for marine research waned during World War I only to be revived in the interwar period and again in the 1960s During the Cold War oceans were variously recast as battlefields post apocalyptic living spaces and utopian frontiers The ocean today has become a site of continuous observation and experiment as probes ride the ocean currents and autonomous and remotely operated vehicles peer into the abyss Embracing our fears fantasies and scientific investigations Antony Adler tells the story of our relationship with the seas      **Confronting Ecological and Economic Collapse** Laura Westra, Prue Taylor, Agnès Michelot, 2013-06-07 From the first appearance of the term in law in the Clean Water Act of 1972 US ecological integrity has been debated by a wide range of researchers including biologists ecologists philosophers legal scholars doctors and epidemiologists whose joint interest was the study and understanding of ecological biological integrity from various standpoints and disciplines This volume discusses the need for ecological integrity as a major guiding principle in a variety of policy areas to counter the present ecological and economic crises with their multiple effects on human rights The book celebrates the 20th anniversary of the Global Ecological Integrity Group and reassesses the basic concept of ecological integrity in order to show how a future beyond catastrophe and disaster is in fact possible but only if civil society and ultimately legal regimes acknowledge the necessity to consider ecointegrity as a primary factor in decision making This is key to the support of basic rights to clean air and water for halting climate change and also the basic rights of women and indigenous people As the authors clearly show all these rights ultimately depend upon accepting policies that acknowledge the pivotal role of ecological integrity      *Future Survey Annual 1987* Michael Marien, 1988-01-01      **Neptune's Domain** Martin Ira Glassner, 2024-05-01 First published in 1990 Neptune's Domain is organized around one unifying theme the geographic aspects of the new Law of the Sea as expressed primarily in the United Nations Convention on the Law of the Sea The first two chapters provide essential background information Chapters 3 through 9 explain relevant provisions of the Convention The next two chapters cover topics excluded from the Convention and the last three chapters are more analytical

and future oriented All students and scholars concerned with the human use of the marine environment will welcome this book whether they be geographers political scientists or lawyers      Ecological Integrity, Law and Governance Laura Westra,Klaus Bosselmann,Janice Gray,Kathryn Gwiazdon,2018-04-27 Ecological integrity is concerned with protecting the planet in a holistic way while respecting ethics and human rights Over recent years it has been introduced directly and indirectly in several legal regimes culminating in international law with the 2016 expanded remit of the International Criminal Court which now includes environmental disasters This book celebrates the 25th anniversary of the Global Ecological Integrity Group GEIG which includes more than 250 scholars and independent researchers worldwide from diverse disciplines including ecology biology philosophy epidemiology public health ecological economics and international law It reviews the role of ecological integrity across a number of fields through inter and trans disciplinary engagement on matters affecting and governing the sustainability of life for both present and future generations These include ethics environmental disasters crimes against humanity and environmental health and how such issues can be subject to sound governance and be incorporated into international law The book also looks forward to new applications of the concept of ecological integrity such as crimes that result in the exploitation of natural resources and the illegal dispossession of land

**World Directory of Environmental Organizations** Thaddeus C. Trzyna,Julie Didion,2013-10-18 A reference and sourcebook to the organizations involved in environmental and resource conservation in all parts of the world and to their activities It describes over 2000 organizations and programmes in over 200 countries providing access to sources of information expertise and action A user s guide identifies who is doing what in over 50 areas such as air quality environmental economics toxic materials and wildlife There are also regional overviews detailed analyses of the UN system over 250 intergovernmental agencies over 400 international NGOs and over 1500 national organizations with full country and area listings plus indices a glossary and a list of landmark events      **Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1996** United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies,1995      *Perestroika and International Law* William E. Butler,2024-08-19      **Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1996: no subtitle statement** United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies,1995
