Trust and Power Niklas Luhmann, 2017-10-16 In this important book Niklas Luhmann uses his powers as an analyst of the social system to examine two of the most important concepts which hold that system together and allow it to evolve trust and power. He criticises those theoretical accounts whose roots lie in what he refers to as ideologies accounts which use implicit beliefs in particular conceptions of human nature to explain and predict social action in a one dimensional way. Theories of rational choice and moralistic explanations are taken to task as are the theories of both Marx and Habermas. Luhmann's unique scientific sociology underpins every page and enables him to highlight the potential shortcomings of these narrative approaches. Underlying this approach is the idea that ideologically based social theory whether critical or conservative is unable to do justice to the complexities existing within the parameters of social systems individuals and the interactions between them. He aims to show instead how only a painstaking systems analysis can capture these intricacies. Although written over 40 years ago Luhmann's complex vision of the operations of trust and power provides a wealth of insights of considerable value to scholars and students grappling with contemporary social and economic problems. The editors' introduction to this new edition and the significant revisions they have made to the translation will help to reveal the richness and clarity of this vision and its relevance to the ways that trust and power operate in today's society.

The Coming of God Jürgen Moltmann, Margaret Kohl, 2004-07-27 Winner of Grawemeyer Award In this remarkable and timely work in many ways the culmination of his systematic theology world renowned theologian Jürgen Moltmann stands Christian eschatology on its head. Moltmann rejects the traditional approach which focuses on the End an apocalyptic finale as a kind of Christian search for the final solution. He centers instead on hope and God's promise of new creation for all things. Christian eschatology he says is the remembered hope of the raising of the crucified Christ so it talks about beginning afresh in the deadly end. Yet Moltmann's novel framework deeply informed by Jewish and messianic thought also fosters rich and creative insights into the perennially nettling questions of eschatology. Are there eternal life and personal identity after death? How is one to think of heaven, hell and purgatory? What are the historical and cosmological dimensions of Christian hope? What are its social and political implications? In a heartbreakingly fragile and fragment world Moltmann's comprehensive eschatology surveys the Christian vista bravely envisioning our horizons of expectation for personal, social even cosmic transformation in God.

The Temporality of Determinacy Conor Husbands, 2022-06-16 Metaphysics has often held that laws of nature if legitimate must be time independent. Yet mounting evidence from the foundations of science suggests that this constraint may be obsolete. This book provides arguments against this atemporality conjecture which it locates both in metaphysics and in the philosophy of science drawing on developments in a range of fields from the foundations of physics to the philosophy of finance. It then seeks to excavate an alternative philosophical lineage which reconciles time dependent laws with determinism converging in the thought of Immanuel Kant.

What Civilization Is Not Devajit Bhuyan, 2023-02-12 Civilization is in a race

between education and catastrophe Let us learn the truth and spread it as far and wide as our circumstances allow For the truth is the greatest weapon we have H G Wells Whenever we speak about civilization we understand is a society characterized by the existence of the state that has developed culture language a writing system books currency banking trading etc Civilizations are additionally characterized by specialization of labour agriculture architecture infrastructure technological advancement computers internets destructive bombs and nuclear weapons The civilization that started with the discovery of fire wheel and agriculture started to move in the path of technological development with lightning speed since last part of the 20th Century However the age old mindset of people regarding war discrimination violence destruction and killing of people on flimsy grounds has not at all changed Technology is a double edged sword making and breaking civilization since time immemorial We have seen first and second world war but we have learnt no lesson from it Only love brotherhood and toleration can save our modern civilization not technology alone This book is written during Russia Ukraine to promote brotherhood and educate fellow human beings to take care of our present civilization and save it from destruction and annihilation like old civilizations Descriptions Don Ihde,Hugh J. Silverman,1985-01-01 Phenomenology in America has developed in unique directions with respect to descriptive analysis and in relation to interdisciplinary fields Descriptions examines current trends in phenomenology It begins by reflecting on phenomenological description itself then takes phenomenology into such areas as time science and the arts the social and into the universities Ranging from the development of theory by such well known philosophers as Maurice Natanson and Robert Sokolowski this collection addresses the topics of pregnant subjectivity nostalgia the ethical function of architecture computer science and academic freedom *The Buddha Eye* Frederick Franck,2004-03-01 Contains essays by many of the most important twentieth century Japanese philosophers offering challenging and illumination insights into the nature of Reality as understood by the school of Zen **Thinking with Kierkegaard** Arne Grøn,2022-12-31 Arne Gr n s reading of S ren Kierkegaard s authorship revolves around existential challenges of human identity The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard s text with a constant focus on issues in contemporary philosophy Contrary to many approaches to Kierkegaard s authorship Gr n does not read Kierkegaard in opposition to Hegel The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship and Gr n uses these negative phenomena to argue for the basically ethical aim of Kierkegaard s work In Gr n s reading Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and God This book should be of interest to philosophers theologians literary studies scholars and anyone with an interest not only in Kierkegaard but also in human identity The Pivotal Generation Henry Shue,2022-01-11 We all recognize that climate

change is a supremely important issue of our time which requires both trans national and trans generational collaboration and shared responsibility What we haven't yet fully appreciated argues political philosopher Henry Shue are the ethical considerations surrounding the fact that the next one or two decades will determine whether climate change which already has led us to dangerous effects will surge into inescapably disastrous effects The people alive today thus represent a pivotal generation in human history For the past two centuries humans have undermined our climate at an increasing rate in ways that the present generations are the first to fully understand and the last to be able to reverse But our responsibility for decisive and immediate action rests on three special features of the relation of our present to the future that many have failed to realize 1 future generations face dangers greater than ours even if we act robustly 2 the worsening dangers for future generations are currently without limit and 3 a less robust effort by us is likely to allow climate change to pass critical tipping points for severely worse and potentially unavoidable future dangers Shue a renowned scholar of ethics politics and international relations who has been studying the ethics of climate change for the last two decades guides us through what our ethical responsibilities to others are both across the world but especially over time and what those commitments require us to do in addressing the climate change crisis now and forcefully

Science Fiction and the Historical Novel Ian P. MacDonald, Kate Polak, 2024-09-16 If you woke to realize that you could rewrite your yesterday without knowing the kind of tomorrow it would grant you would you do it Are the authors of our destiny working with an outline or spit balling confusing plotlines Since the past changes possible futures to what alighting butterfly should we pay the most heed This book explores the liminal space between speculative fiction and the historical novel Staged as a transnational multicultural conversation it takes up a call originally made by Fredric Jameson in *Archaeologies of the Future* wherein he describes that flashpoint between speculative and historical genres as the symptom of a mutation in our relationship to historical time itself Drawing together postcolonial feminist cultural Indigenous and cognitive approaches *Science Fiction and the Historical Novel* asks what the past can offer a future oriented world and how the future can be imagined in relation to a past that seeks narratives of inevitability rather than possibility Engaged with the

idea of the past as a model for the future authors in this volume probe the extent to which historical scripts delimit possibilities and how authors engaged with the practice of alternative pasts rewrite potentialities in the present

Augustine and Time John Doody, Sean Hannan, Kim Paffenroth, 2021-05-25 This collection examines the topic of time in the life and works of Augustine of Hippo Adopting a global perspective on time as a philosophical and theological problem the volume includes reflections on the meaning of history the mortality of human bodies and the relationship between temporal experience and linguistic expression As Augustine himself once observed time is both familiar and surprisingly strange Everyone's days are structured by temporal rhythms and routines from watching the clock to whiling away the hours at work Few of us however take the time to sit down and figure out whether time is real or not or how it is we are able to hold our past present and future thoughts together in a straight line so that we can recite a prayer or sing a song Divided into five sections the essays collected here highlight the ongoing relevance of Augustine's work even in settings quite distinct from his own era and context The first three sections organized around the themes of interpretation language and gendered embodiment engage directly with Augustine's own writings from the Confessions to the City of God and beyond The final two sections meanwhile explore the afterlife of the Augustinian approach in conversation with medieval Islamic and Christian thinkers like Avicenna and Aquinas as well as a broad range of Buddhist figures like Dharmakirti and Vasubandhu What binds all of these diverse chapters together is the underlying sense that regardless of the century or the tradition in which we find ourselves there is something about the puzzle of temporality that refuses to go away Time as Augustine knew demands our attention This was true for him in late ancient North Africa It was also true for Buddhist thinkers in South and East Asia And it remains just as true for humankind in the twenty first century as people around the globe continue to grapple with the reality of time and the challenges of living in a world that always seems to be speeding up rather than slowing down

The Circular Economy in Europe Zora Kovacic, Roger Strand, Thomas Völker, 2019-11-07 The Circular Economy in Europe presents an overview and a critical discussion on how circularity is conceived imagined and enacted in current EU policy making In 2013 the idea of a circular economy entered the stage of European policy making in the efforts to reconcile environmental and economic policy objectives In 2019 the European Commission declared in a press release that the Circular Economy Action Plan has been delivered The level of circularity in the European economy however has remained the same Bringing together perspectives from social sciences environmental economics and policy analysis The Circular Economy in Europe provides a critical analysis of policies and promises of the next panacea for growth and sustainability The authors provide a theoretical and empirical basis to discuss how contemporary societies conceive their need to reorganise production and consumption and explores the messy assemblage of institutions actors waste streams biophysical flows policy objectives scientific disciplines values expectations promises and aspirations involved This book is essential reading for all those interested in understanding how ideas about the circular economy emerged historically how they gained traction and
