Philosophy is the search for the large patterns of the world and of the large patterns of experience perceptual theoretical

aesthetic and practical the patterns that regardless of specific contents characterize the main types of experience In this book I carry out my search for the large patterns of practical experience the experience of deliberation of recognition of duties and their conflicts of attempts to guide other person s conduct of deciding to act of influencing the physical world with one s doings and the like This is the experience that makes possible our social life the formulation of plans for teamwork the building of institutions the development of nations and the adoption of the ideal of morality Here I develop a network of theories about the most fundamental aspects of practical thinking what is thought in such thinking what makes that thinking correct what makes it practical and the structure of the doings that accrue to the world when such thinking is effective I have attempted to build each theory in sufficient detail so that it illuminates its subject matter with a certain degree of fullness But I have also aimed at producing an harmonious system of theories so that the grand pattern of practical thinking can be admired not only for the beauty of the separate structures of its parts but also for its architectonic unity Chapter 1 gives the details of the many facets of this project and discusses some methodological techniques
