*Lethality, Legality, and Reality* Timothy M. Cullen, 2008 This study evaluates the potential for non lethal weapons to become viable tools for the air support of ground forces in military conflicts During the Cold War the US Air Force developed conventional air support aircraft and munitions to fight Soviet mechanized infantry and armor in the central plains of Europe Since the end of the Cold War the United States increasingly confronts adversaries in situations where it is not in the national interest to use destructive force In response to this new security environment the Department of Defense has established the Joint Non Lethal Weapons Program and deployed a myriad of non lethal devices to conflicts around the world All non lethal weapons in the US armed forces however are ground weapons and are severely limited in range Aircraft could provide the perspective and added range

The Warrior, Military Ethics and Contemporary Warfare Pauline M. Kaurin, 2016-02-17 When it comes to thinking about war and warriors first there was Achilles and then the rest followed The choice of the term warrior is an important one for this discussion While there has been extensive discussion on what counts as military professionalism that is what makes a soldier sailor or other military personnel a professional the warrior archetype varied for the various roles and service branches still holds sway in the military self conception rooted as it is in the more existential notions of war honor and meaning In this volume Kaurin uses Achilles as a touch stone for discussing the warrior military ethics and the aspects of contemporary warfare that go by the name of asymmetrical war The title of the book cuts two ways Achilles as a warrior archetype to help us think through the moral implications and challenges posed by asymmetrical warfare but also as an archetype of our adversaries to help us think about asymmetric opponents

**Asymmetry and U.S. Military Strategy: Definition, Background, and Strategic Concepts ,**

**Emerging Technologies and International Stability** Todd S. Sechser, Neil Narang, Caitlin Talmadge, 2021-11-28

Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies

Through a Glass Darkly Stephen J. Cimbala, 2001-06-30 Cimbala shows why the prevention management and concluding of war all require an understanding of the subjective aspects of decision making as well as the hardware and tactics of military operations A review of past cases of U S security policy decision making and a preview of some future problems are combined to distill important lessons about coping with conflict in the post Cold War world These lessons include the awareness that some conflicts are unnecessarily provoked or prolonged on account of the gap between the perspectives and experiences of civilian policy makers and the views of the armed forces leadership Another important lesson is that in resolving or managing conflicts perceptions and expectations of leaders filter out alternatives that might have led to preferred solutions had they been attempted in good time Of particular interest to

policy makers military professionals and researchers involved with contemporary military issues      **Resolving Conflicts in the Law** Chiara Giorgetti, Natalie Klein, 2019-01-03 Resolving Conflicts in the Law edited by Chiara Giorgetti and Natalie Klein honours the work of Professor Lea Brilmayer whose intellectual contribution and influence span scholarly debate and the practice of both public and private international law The book s essays are from leading international law scholars and practitioners in the field including Michael Reisman Stephen Schwebel Erin O Connor O Hara John Crook Philippa Webb Kermit Roosevelt Harold Koh and reflect on contemporary and cutting edge questions of international law Each contribution enriches and advances scholarly debate on topics of law for which Lea Brilmayer is well known including international dispute settlement conflicts of law international relations theory secession and territorial and maritime sovereignty      *War in an Age of Risk* Christopher Coker, 2013-05-08 Wars throughout history have been fought in the name of ideology religion and the pursuit of peace Our thinking about war when it is justified how it should be fought and how it is perceived has changed dramatically over time Whereas in the past war has been seen as a battle of wills this provocative and illuminating new book shows how war has evolved into an exercise in risk management In a rare blend of political science sociology history and cultural thought Christopher Coker peels away the layers of meaning shrouding our current understanding of war and warfare Using the ideas of writers such as Zygmunt Bauman Ulrich Beck and Frank Furedi he shows that risk has become the language of business politics and public policy and so we should not be surprised that it has now become the language of war The book highlights the increasing difference between homeland security and national security in the modern world arguing that the defense of the citizen is often now more challenging than the defense of the state By demonstrating the changing character and complexity of conflict from World War I to the current the current fight against terrorism the book provides a powerful and highly distinctive account of the re branding of war in an age of risk This book is set to ignite debate amongst students and scholars of international politics as well as appealing to anyone interested in war and its place in contemporary society      **War Made New** Max Boot, 2006-10-19 A monumental groundbreaking work now in paperback that shows how technological and strategic revolutions have transformed the battlefield Combining gripping narrative history with wide ranging analysis War Made New focuses on four revolutions in military affairs and describes how inventions ranging from gunpowder to GPS guided air strikes have remade the field of battle and shaped the rise and fall of empires War Made New begins with the Gunpowder Revolution and explains warfare s evolution from ritualistic drawn out engagements to much deadlier events precipitating the rise of the modern nation state He next explores the triumph of steel and steam during the Industrial Revolution showing how it powered the spread of European colonial empires Moving into the twentieth century and the Second Industrial Revolution Boot examines three critical clashes of World War II to illustrate how new technology such as the tank radio and airplane ushered in terrifying new forms of warfare and the rise of centralized and even totalitarian world powers Finally Boot focuses on the Gulf War the invasion of Afghanistan and the Iraq War arguing

that even as cutting edge technologies have made America the greatest military power in world history advanced communications systems have allowed decentralized irregular forces to become an increasingly significant threat **Late Modernity** Margaret S. Archer, 2014-03-10 This volume examines the reasons for intensified social change after 1980 a peaceful process of a magnitude that is historically unprecedented It examines the kinds of novelty that have come about through morphogenesis and the elements of stability that remain because of morphostasis It is argued that this pattern cannot be explained simply by acceleration Instead we must specify the generative mechanism s involved that underlie and unify ordinary people s experiences of different disjunctions in their lives The book discusses the umbrella concept of social morphogenesis and the possibility of transition to a Morphogenic Society It examines possible generative mechanisms accounting for the effects of social morphogenesis in transforming previous and much more stable practices Finally it seeks to answer the question of what is required in order to justify the claim that Morphogenic society can supersede modernity
