**Multispecies Futures** Roman Bartosch, Liza B. Bauer, Alexandra Böhm, Micha Gerrit Philipp Edlich, Greta Gaard, Björn Hayer, Andreas Hübner, Michaela Keck, Maria Moss, Jobst Paul, Mieke Roscher, Pamela Steen, Nils Steffensen, 2022-06-14 In light of the dramatic growth and rapid institutionalization of human animal studies in recent years it is somewhat surprising that only a small number of publications have proposed practical and theoretical approaches to teaching in this inter and transdisciplinary field Featuring eleven original pedagogical interventions from the social sciences and the humanities as well as an epilogue from ecofeminist critic Greta Gaard the present volume addresses this gap and responds to the demand by both educators and students for pedagogies appropriate for dealing with environmental crises The theoretical and practical contributions collected here describe new ways of teaching human animal studies in different educational settings and institutional contexts suggesting how learners equipped with key concepts such as agency or relationality can develop empathy and ethical regard for the more than human world and especially nonhuman animals As the contributors to this volume show these cognitive and affective goals can be achieved in many curricula in secondary and tertiary education By providing learners with the tools to challenge human exceptionalism in its various guises and related patterns of domination and exploitation in and outside the classroom these interventions also contribute to a much needed transformation not only of today's educational systems but of society as a whole This volume is an invitation to beginners and experienced instructors alike an invitation to reconsider how we teach human animal studies and how we could and should prepare learners for an uncertain future in ideally a more egalitarian and just multispecies world With contributions by Roman Bartosch Liza B Bauer Alexandra B hm Micha Gerrit Philipp Edlich Greta Gaard Bj rn Hayer Andreas H bner Michaela Keck Maria Moss Jobst Paul Mieke Roscher Pamela Steen and Nils Steffensen

**Tourism and Heritage: Shaping Sustainable and Innovative Futures** Walter Leal Filho, Larbi Safaa, Dalia Perkumienė, Maria Alzira Pimenta Dinis, 2025-06-26 This book brings together multidisciplinary contributions from various academic and professional backgrounds addressing the challenges and opportunities of sustainable tourism. It focuses on diverse themes such as the management of intangible cultural heritage, responsible practices in the tourism sector, and technological innovations including artificial intelligence. This book provides a comprehensive view of the sector through a variety of perspectives taking into account environmental, social, economic, and legal aspects. This diversity allows for the exploration of complex issues such as the sustainable management of natural resources, the protection of tourists' personal data in a digital context, and partnerships between tourism actors and local communities for the preservation of cultural heritage. One key issue explored is the growing role of technology, including reflections on the use of artificial intelligence in combating tourism-related cybercrime. The contributions come from authors affiliated with a wide range of institutions representing internationally renowned organizations from regions as diverse as Europe, Belgium, Lithuania, Latvia, Hungary, France, Italy, Portugal, Spain, as well as Turkey, Africa, Morocco, and Asia, China. This geographic and institutional diversity enriches the discussion on sustainable practices and innovations in the tourism sector, integrating both local and global perspectives. The accessibility of public spaces and leisure services for tourists, as well as market segmentation, are also discussed. This book stands out for its interdisciplinary approach, combining theory and practice to provide researchers, tourism professionals, policymakers, and heritage managers with innovative tools and strategies. It offers concrete and ethical solutions for the development of sustainable tourism that respects the cultural and natural values of territories while addressing contemporary demands for social and environmental responsibility.

*Ethical futures: bioscience and food horizons* Kate Millar, Pru Hobson West, Brigitte Nerlich, 2023-09-04 In an ever changing interconnected world the agriculture and food system faces constant challenges in many forms such as the impacts of climate change uncertainty surrounding the use of novel technologies and the emergence of new zoonotic diseases. Alongside these challenges professionals working in the food system are faced with opportunities to improve food production and distribution. As decision makers attempt to balance these threats and opportunities in order to secure more sustainable production systems the key question that arises is What do we envisage as the future for agriculture and food production. With numerous voices advocating different and sometimes conflicting approaches ranging from organic farming to wider use of GMOs through in vitro meat production this discussion of the future raises significant ethical questions. The contributions in this book bring together a diverse group of authors who explore a set of themes relating to the ethical dimensions of the agriculture and food futures including the role of novel technologies the potential issues raised by the use of biofuels the ethics of future animal production systems concepts of global food security as well as chapters on food governance priorities and educational aspects. It is intended that this volume serves as an interesting collection and acts as a source of stimulation that will contribute to wider debate and reflection on the future of the agriculture and food system.

**The Future of Meat Without Animals** Brianne Donaldson, Christopher Carter, 2016-08-16 Plant based and cell cultured meat milk and egg producers aim to replace industrial food production with animal free fare that tastes better costs less and requires a fraction of the energy inputs. These products are no longer relegated to niche markets for ethical vegetarians but are heavily funded by private investors betting on meat without animals as mass market environmentally feasible alternatives that can be scaled for a growing global population. This volume examines conceptual and cultural opportunities

entanglements and pitfalls in moving global meat egg and dairy consumption toward these animal free options Beyond surface tensions of meatless meat and animal free flesh deeper conflicts proliferate around naturalized accounts of human identity and meat consumption as well as the linkage of protein with colonial power and gender oppression What visions and technologies can disrupt modern agriculture What economic and marketing channels are required to scale these products What beings and ecosystems remain implicated in a livestock free food system A future of meat without animals invites adjustments on the plate but it also inspires renewed habits of mind as well as life affirming innovations capable of nourishing the contours of our future selves This book illuminates material and philosophical complexities that will shape the character of our future s of food
