Bowman,2010-11-20 This is the book that puts the flesh on the bones of its reputation as one of the best aircraft of the Second World War Pennant Magazine The flak started about four or five minutes before the target and immediately it was apparent that it was intense and extremely accurate Oboe entailed the pilot flying dead straight and level for ten minutes on the attack run Suddenly a tremendous flash lit up the sky about 50 yards ahead of our nose and exactly at our altitude Within a tenth of a second we were through the cloud of dirty yellowish brown smoke and into the blackness beyond I shall never forget the spontaneous reaction of both my pilot and myself We turned our heads slowly and looked long and deep into one another s eyes no word was spoken no words were needed The Mosquito was probably World War II s most versatile combat aircraft This book contains hundreds of firsthand accounts from many of the two man crews who flew in them pilots and navigators It portrays the dramatic experiences of flying in its many roles as pathfinder night fighter reconnaissance aircraft precision bombing and low level ground attack aircraft It describes many of the RAF s most audacious raids on prime but difficult targets where carpet bombing by heavy bombers was likely to be ineffective and cause unnecessary casualties to civilians It is a remarkable record of the aircraft and the men that flew them

Fighter Operations in Europe and North Africa, 1939-1945 David Wragg,2012-02-29 Fighter Operations in Europe and North Africa 1939 1945 tells the story of Allied and German fighter pilots in Europe over the Mediterranean and in North Africa during the Second World War The book starts with the early skirmishes as each side tested the others defenses moves through the Battle of Britain and then the Blitz when the emphasis switched from single engined day fighters to twin engined night fighters while increasingly fighters were used to sweep over enemy air fields and lines of communication in occupied France This overlapped with the need to provide air cover for the besieged island fortress of Malta by day and by night as

well as defensive operations against Axis forces in Crete and North Africa but as the balance of power changed in North Africa the Desert Air Force was formed incorporating elements from many Allied air forces and the emphasis moved to offensive operations in support of ground forces. The invasions of Italy and the South of France also called for fighter cover initially by carrier based aircraft. The lessons learnt in North Africa were put to good use by the 2nd Allied Tactical Air Force which accompanied the advancing allied armies towards and eventually into Germany achieving all important air supremacy which was a major factor in the Allied victory. The book also covers Luftwaffe fighter pilots as they sought to stop the RAF by night and the USAAF by day against increasingly overwhelming odds. *Rcaf War Prize Flights, German and Japanese Warbird Survivors* Harold A. Skaarup, 2006-05-23 This handbook concerns the collection of Air Technical Intelligence and the test flying of war prizes carried out by two RCAF bomber pilots who were posted to the Royal Aircraft Establishment's Foreign Aircraft Flight Farnborough in the United Kingdom in May 1945. Their primary task was to visit former Luftwaffe airfields and to find and fly back any aircraft they deemed worthy of evaluation. The list of aircraft found here does not include every German combat aircraft of the Second World War as it focuses on those warbirds captured and flown by members of the RCAF or sent to Canada as war prizes. Very few of these rare aircraft exist today and therefore information on known locations where German Japanese and Italian warbird survivors may be found is included. As a member of the Canadian Aviation Preservation Association and the Canadian Aviation Artists Association the author strongly supports the preservation of Canada's aviation heritage. The primary intent of this handbook is to provide information for aviation artists and enthusiasts looking for that unusual never before painted military aviation subject and to support the efforts of those engaged in the search for those missing warbirds for which no examples currently exist. *From Spitfire to Focke Wulf* H. Leonard Thorne, 2013-09-02 I hold the greatest respect for Len for what he achieved in the RAF. Gordon Mitchell son of Spitfire designer R J Mitchell. In May 1940 20 year old Len Thorne joined the RAF as did many young men during the Second World War. After two hectic tours of operational duty as a fighter pilot including some desperately dangerous low level flying at Dunkirk he was posted to AFDU Air Fighting Development Unit and remained there as a test pilot for the rest of the war. Fortunately for us Len kept a detailed diary which set alongside his log book tells the unique story of a test pilot tasked with developing operational tactics and testing captured enemy aircraft such as the feared Fw 190. During Len's career he worked alongside some of the most famous fighter aces and his records cast light on some of the most famous flyers of the RAF including Wing Commander Al Deere and Spitfire aces Squadron Leader Paddy Finucane Ernie Ryder and many others. A unique record of military aviation history. *From Spitfire to Focke Wulf* offers a window to this era of rapid and high stakes aircraft development. *Air Force Magazine*, 2004 **Vermisst** Jonathan Nicholas, 2023-05-28 Young Paul Goetz loves aeroplanes and so joins the Luftwaffe as soon as he can. Like so many he's taken in swept along in the unquestioning tide of excitement keen to be airborne as a fighter pilot. **Untold Valor** Rob Morris, 2006 First hand accounts of Europe's air war

from those who beat the odds *Spitfire Saga* Angus Mansfield, 2019-01-21 Rodney Scrase's life in the RAF began in an old airship shed where he took the King's shilling in May 1941. He learnt to fly at a BFTS in America and went on to fly Spitfires with No 72 and No 1 Squadrons, finally being awarded the Distinguished Flying Cross in 1944. He was released from service with a record of 4 destroyed and 3 damaged, having taken part in the invasions of North Africa, Sicily and Italy, and a stint as an instructor in the art of air to air gunnery in Egypt before finishing the war flying escort missions with No 1 Squadron from Manston in Kent. *Spitfire Saga* uses Rodney's logbooks and first-hand interviews with him and several other pilots. Angus Mansfield presents the unique story of one man's experience of flying the most iconic aircraft of World War II. Complete with thorough historical context and a true insider view of life as an RAF fighter pilot, this book is an excellent addition to any history enthusiast's library.
