work of architect Steven Holl *Idea and Phenomena* focuses on the sculptural expression inherent in his designs material
composition and use of light Apparent in such projects as his Makuhari Housing in Chiba Japan where he designed a new city
block on dredged fill at the rim of Tokyo Bay Holl has devoted over 20 years of his professional life to exploring the use of
movable walls for creating variety and what he calls spaces for individual life Even more essential to his oeuvre is what critic
Herbert Muschamp has described as its astonishing sculptural presence created from the strikingly assured interplay
between windows and walls curves and grids voids and planes In his fine fibred use of materials Holl employs his principle
of the stone and the feather juxtaposing thin sheets of zinc roofing with rough concrete walls along knife edged junctures The
results as *Idea and Phenomena* clearly shows from the first sketch to the final construction are buildings alert to emotional
needs the spiritual properties of space and the specifics of their own surroundings **Paradise Planned** Robert A.M.
Stern,David Fishman,Jacob Tilove,2013-12-03 *Paradise Planned* is the definitive history of the development of the garden
suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and
northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically
outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once
again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals

of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape **The American Architect and Building News** ,1889 **American Architect** ,1899 Morphosis Peter Cook,George Rand,1989 Winners of numerous awards and the subject of exhibitions from Tokyo to Berlin Los Angeles to New York Morphosis architects Thom Mayne and Michael Rotondi are leaders in the avant garde movement of the new architecture of California Through their association with SciArc Southern California Institute for Architecture of which Mayne was a founding member and where Rotondi is the present Director they have also been a leading force for the younger generation of California architects The works of Morphosis have encompassed a wide range of building types including the single family house and multiple unit housing medical facilities and offices restaurants and retail spaces In all projects a hallmark of their work is always a clean crisp coolness expressing their almost uncanny ability to turn the most ordinary materials into surfaces and details of astonishing power and grace The effect of this activity is intensified through structural ambiguity and shifting harmonies in an architecture of economy and of extraordinary sophistication One of the unique features of the methods of design of Morphosis Architects is the way in which they use models and drawings Unlike most architects after a building is completed Mayne and Rotondi go back to the drawings and models reworking and analyzing them as sources of inspiration and generation for new designs It is through this activity of creating and re creating that the name Morphosis is derived
